

**Table A. Use of Internet, by age**

	Age		Total
	High (55+)	Low (15-54)	
Has used the Internet	245	456	701
Has not used the Internet	410	345	755
Total	655	801	1456

1. What are the variables, values and units of analysis in this table? What are the relations between the variables?
2. Analyse the table (Percentuate, find percent differences, and interpret)

**Table B. Daily television viewing time, by gender and education (constructed table)**

	Women		Men		Total
	High edu	Low edu	High edu	Low edu	
Low (2h or less)	87	58	42	67	254
High (over 2h)	98	189	143	164	594
Total	185	247	185	231	848

1. What are the variables, values and units of analysis in this table? What are the relations between the variables?
2. Analyse the table (Percentuate, find percent differences and total effects, and interpret).
