

Article reading

some crucial questions and remarks

NB! Make a written resume not of all bits and pieces but of the main issues listed below. Try to keep it short not longer than 1-3 pages.

What is the focus of analysis?

What are the theoretical frame and concepts for analysis?

What are the methodological arrangement?

Who are the subjects?

What type of analysis are performed?

What are the main findings?

If relevant – what technological solution are used?

If relevant – what kind of learning perspective has been used while these technological solutions were designed?

Present some questions you like to discuss with the group and/or issues you find hard to understand.

How does this article fits in with other articles you have read?

Be as faithful as possible to the writers although you do not share all their assumptions!

Oral presentation in the group

Prepare a power point presentation.

Use the above questions to structure your talk.

One foil takes approx 3 minutes to present which means about 15-20 minutes presentation.

IMPORTANT! Send the resume doc and ppt to Anders or me by e-mail latest the same day as you will give the presentation. Label it with the authors names, the presentation data, and your name: Wood et al 20032011 Nima.
