The Physicist's approach to the
Subject—With an Epilogue on
Determinism and Free Will

CAMBRIDGE UNIVERSITY PRESS

We need new approaches!

Life sciences with more extensive collaboration
across disciplines and across sectors.

Health & environment

Better health services and better methods for diagnosing, preventing and treating diseases

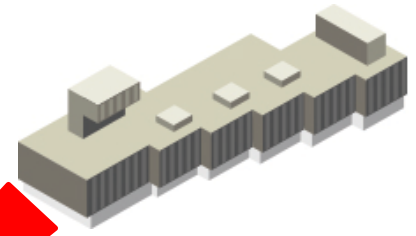

Knowledge-based, sustainable management of natural resources, for example fish populations

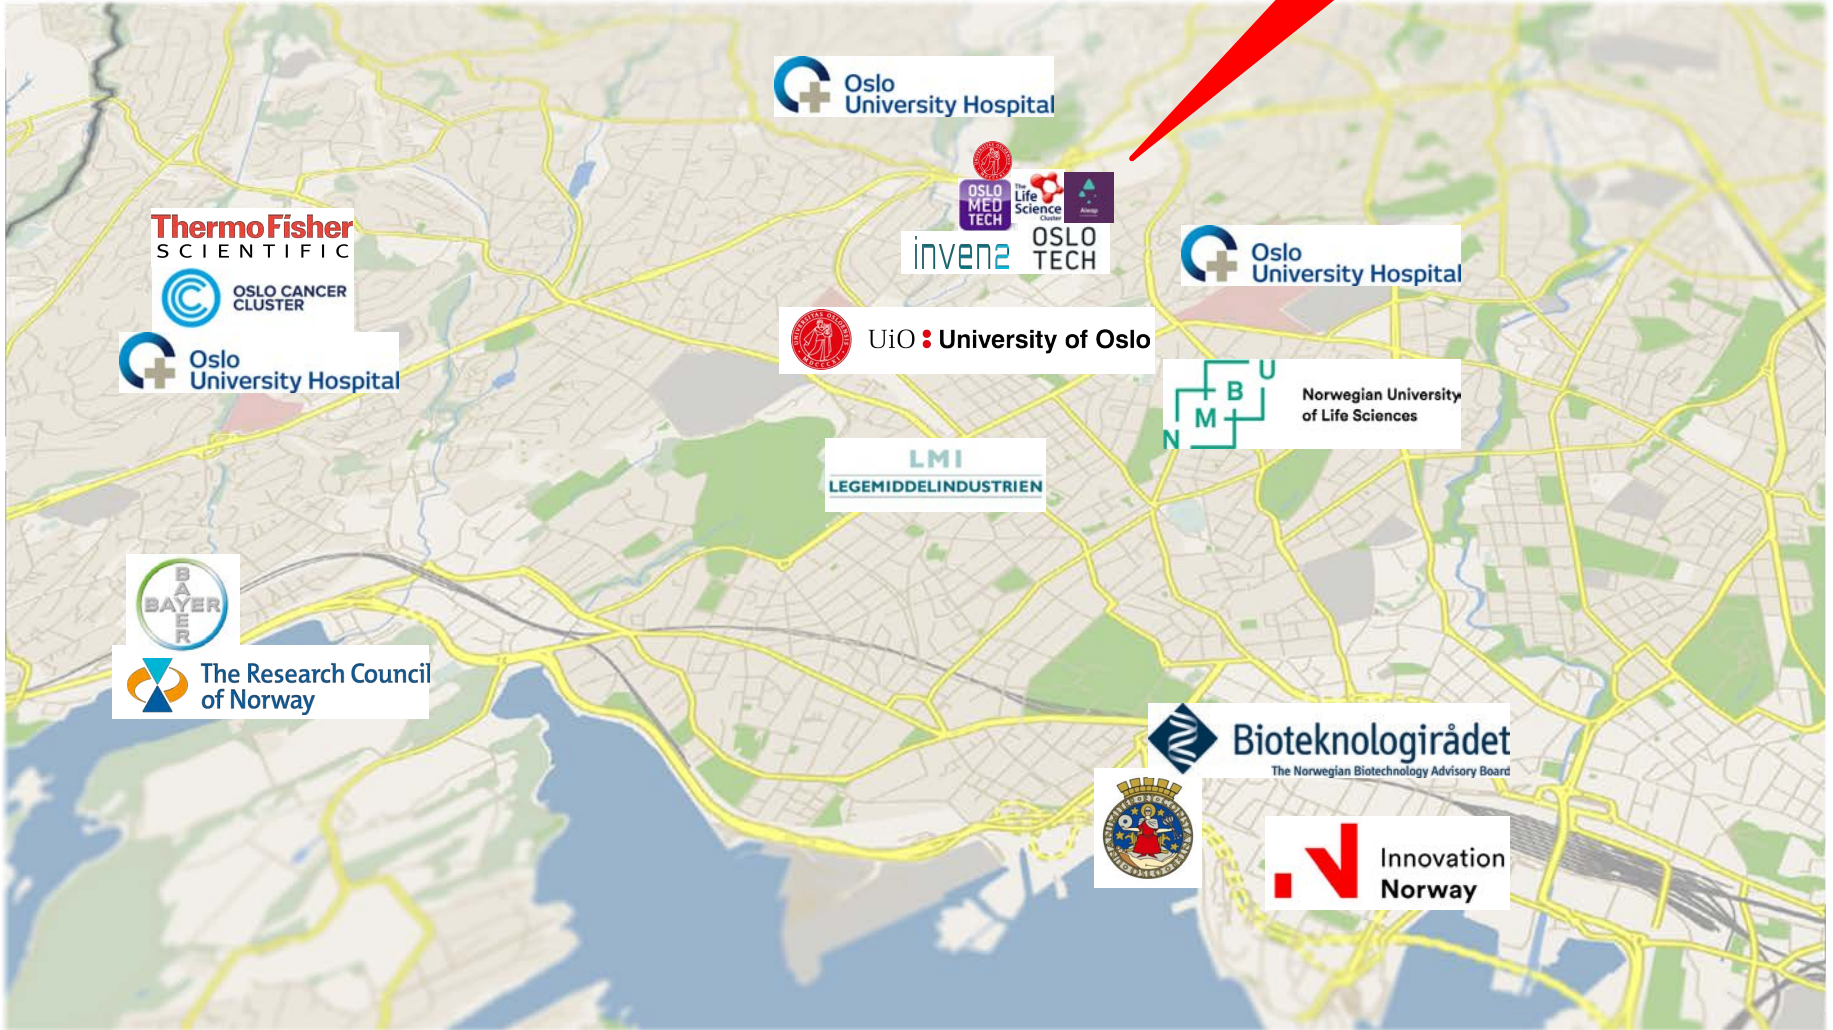

Value creation & international competitiveness

What does a life science city look like?

 UiO : University of Oslo
