### **– Advanced Macroeconomic Theory**

This is a master and a PhD class at the same time, which poses some difficulties. On the one hand it has to build on our Macro Master classes and on the other hand has to be on a PhD level. This is particularly challenging since UiO Master students taking this class had only 13 weeks of modern macro-classes.

To meet this challenge, I adjusted the level (methodology and mathemstics used), but not the topics covered, accordingly. Overall the adjustments were good and appropriate but there is room for improvement to remove some not absolutely necessary technical details which caused problems for the students
