Update from NORAD 18 June

Invite users to collaborate on your application

You can invite any user who are not part of your organization to collaborate on your application. They do not need to be registered as a member of the applicant organization, but they have to register as users in the portal before you can invite them.

To invite them to collaborate on your application, open the application and go to Collaboration in the top menu. Here you can invite them to contribute to this application, by searching for their registered e-mail address.

If you are invited to collaborate on an application, you will find this under the menu "Shared with me" when you are logged in.
