

You should answer a total of 4 questions.

A. Answer one of these questions: (i.e., either 1 or 2, not both).

1. (i) What is the motivation for (the arguments in favor of) experimental philosophy?
(ii) Assess some arguments against experimental philosophy. (Note that to answer this question, you have to answer both (i) and (ii).)
2. What are intuitions and what role do they play in philosophical methodology?

B. Answer one of these questions (i.e., either 3 or 4, not both):

3. Outline Williamson's view of how philosophy can make use of insights from other disciplines.
4. What does Williamson mean by 'model building' and what does he think its role is in philosophy?

C. Answer one of these questions (i.e., either 5 or 6, not both):

5. Why isn't there more progress in philosophy?
6. What is a verbal dispute and how can an account of verbal disputes help us do philosophy?

D. Answer one of these questions (i.e., either 7 or 8, not both):

7. What is conceptual engineering and what role can it play in philosophy?
8. Outline some ways in which feminist philosophy has influenced philosophical methodology.
