

# Project 1 evaluation guidelines

Problems 1-8 : Up to ~~2~~ 2 points deducted for arithmetical mistakes, depending on their severity and the maximum number of points involved (e.g. don't deduct 2 points if the maximum number of points is 3)

Problem 9 : To get the maximum 40 points :

- The code must produce correct results
- It must be reasonably structured
- The plots must be correct, have labelled axes, and have a caption

Problems 10-14 : Same as 9.  
In 14, regarding whether the comparison is fair we accept both "yes" and "no" as answers provided you support your conclusion with reasonable arguments
