

Forslag til pensum

Pensumbok:

Introduction to Pharmaceutical Analytical Chemistry, 2. utgave, av Stih Pedersen-Bjergaard, Bente Gammelgaard og Trine Grønhaug Halvorsen

Kap. 2	Marketing Authorizations, Pharmaceutical Manufacturing and International Pharmacopeias	s. 9-14
Kap. 3	Fundamentals of Bases, Acids, Solubility, Polarity, Partition and Stereochemistry	s. 17-35
Kap. 4	Fundamentals of Pharmaceutical Analytical Chemistry	s. 37-71
Kap. 5	Titration	s. 73-96
Kap. 6	Introduction to Spectroscopic Methods	s. 97-103
Kap. 7	UV-Vis Spectroscopy	s. 105-120
Kap. 8	IR Spectroscopy	s. 121-130
Kap. 9	Atomic Spectrometry	s. 131-142
Kap. 10	Introduction to Chromatography	s. 143-157
Kap. 11	Separation Principles in Liquid Chromatography (kun 11.-11.5)	s. 159-183
Kap. 12	High performance Liquid Chromatography	s. 185-198
Kap. 13	Gas Chromatography	s. 199-214
Kap. 15	Mass Spectrometry (kun 15.1-15.6.4 og 15.7.1)	s. 231-258
Kap. 16	Sample Preparation	s. 259-279
Kap. 17	Quality of Data and Validation	s. 281-303
Kap. 18	Chemical Analysis of Pharmaceutical Ingredients ¹	s. 305-388
Kap. 19	Chemical Analysis of Pharmaceutical Preparations ¹	s. 389-432
Kap. 20	Bioanalysis - Chemical Analysis of Pharmaceutical in Biological Fluids ¹	s. 433-458
Kap. 21	Chemical Analysis of Biopharmaceuticals (Kun 21.2-21.3 og 21.5-21.10) ¹	s. 459-504

¹Blå bokser er ikke pensum, men gir god illustrasjon av pensum

***Chromatography: Basic principles, Sample Preparation and Related Topics* av Elsa Lundanes, Léon Reubsæet, Tyge Greibrokk**

Kapittel 3.6.2 (HPLC-Detectors-Mass Spectrometric Detection), s. 85-95 Unntatt 3.6.2.3 og 3.6.2.4.

Bioanalysis of Pharmaceuticals: Sample Preparation, Separation Techniques and Mass Spectrometry, Steen Honoré Hansen, Stig Pedersen Bjergaard (eds).

Kapittel 6 Sample preparation Kun delkapittel 6.6 Dilute and shoot, s. 110-113
