Final results FYS4160 (spring 2021)

Out of the 46 points that were available in the final exam, 10 were needed to pass. Additionally, up to 5 bonus points from the presentation of problems in the group exercises were given (corresponding to the $10\,\%$ contribution to the final grade, as stated on the course page).

The final grade is then calculated from the total number of points P as follows:

$P \geq 10 :$ **E** (pass)
$P \geq 17 :$ **D**
$P \geq 24 :$ **C**
$P \geq 31 :$ **B**
$P \geq 38 :$ **A**

In detail, the point distribution per problem and final grade is given as follows:

Student number	P 1a	P 1b	P 1c	P 2a	P 2b	P 2c	P 3a	P 3b	P 3c	P 3d	P 4	P 5	Bonus	SUM	Grade
