-) Meltwater plains

Erratics

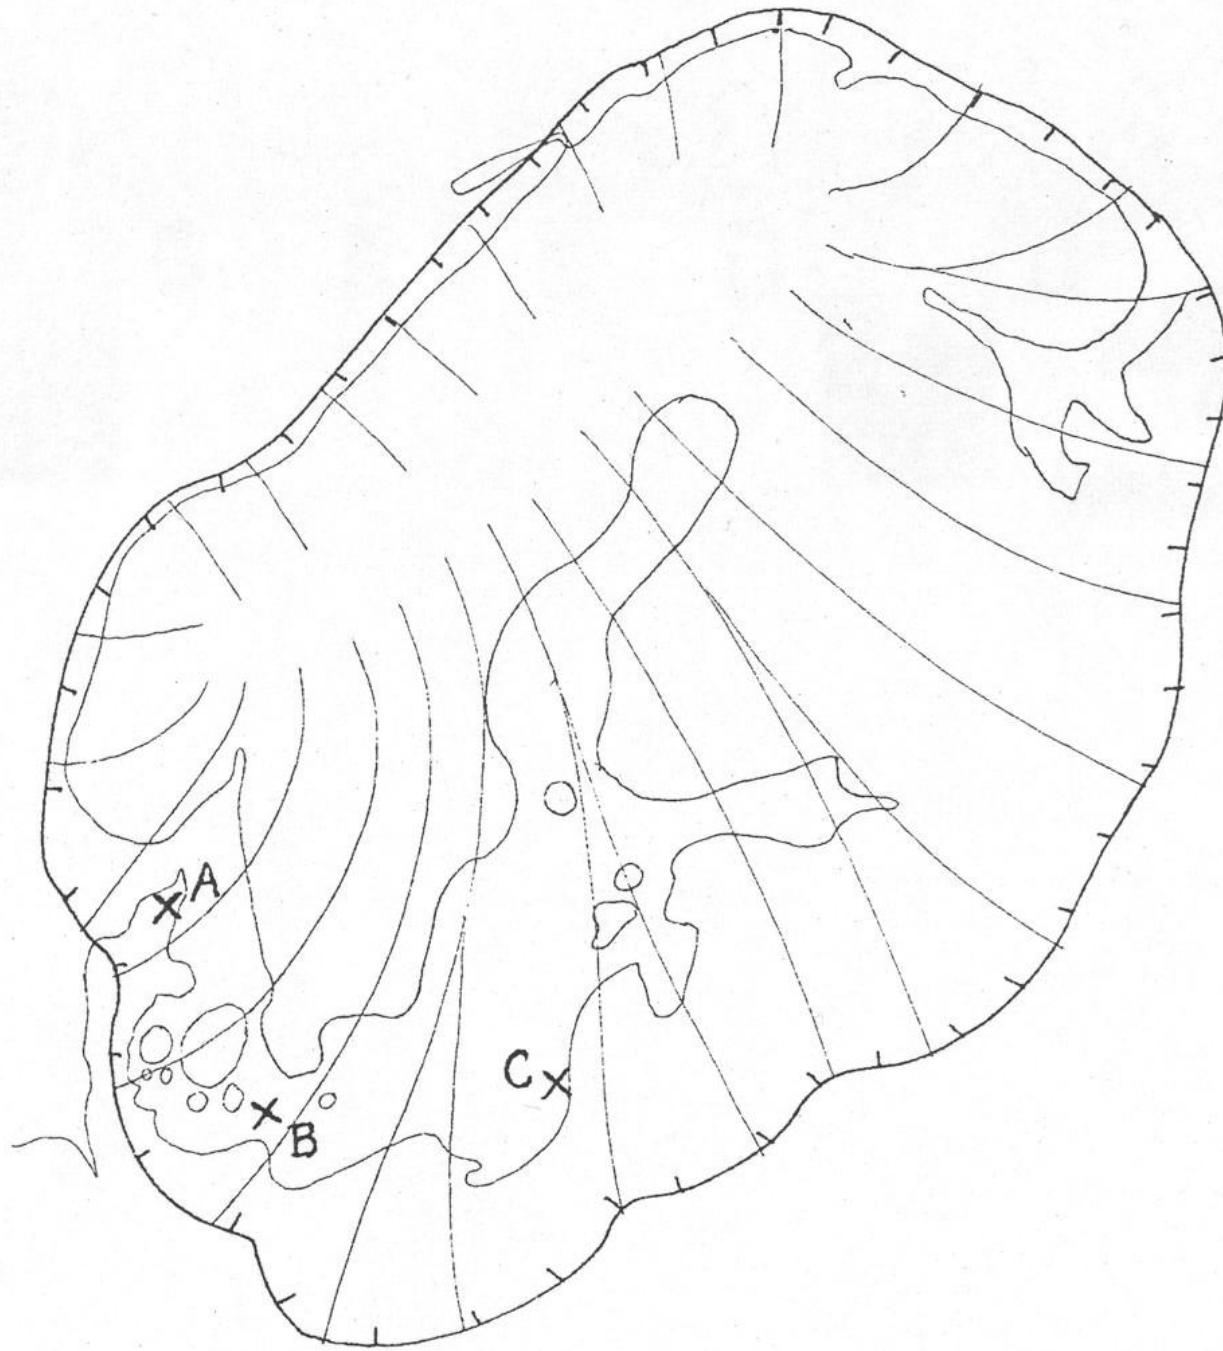

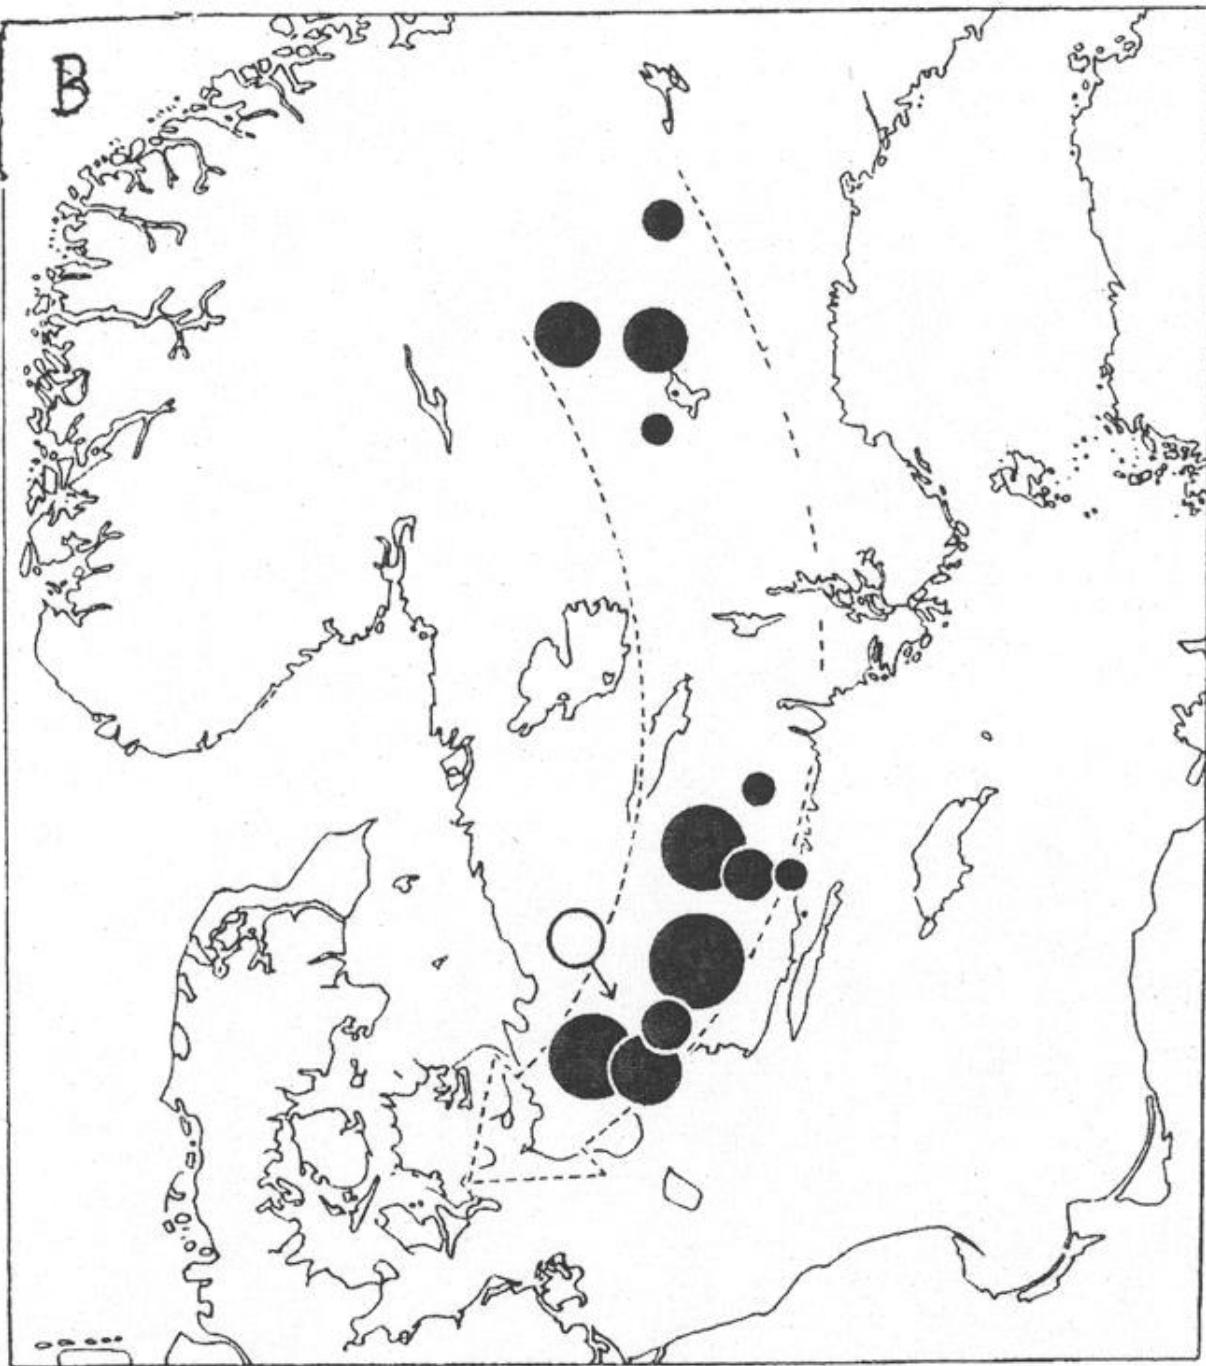

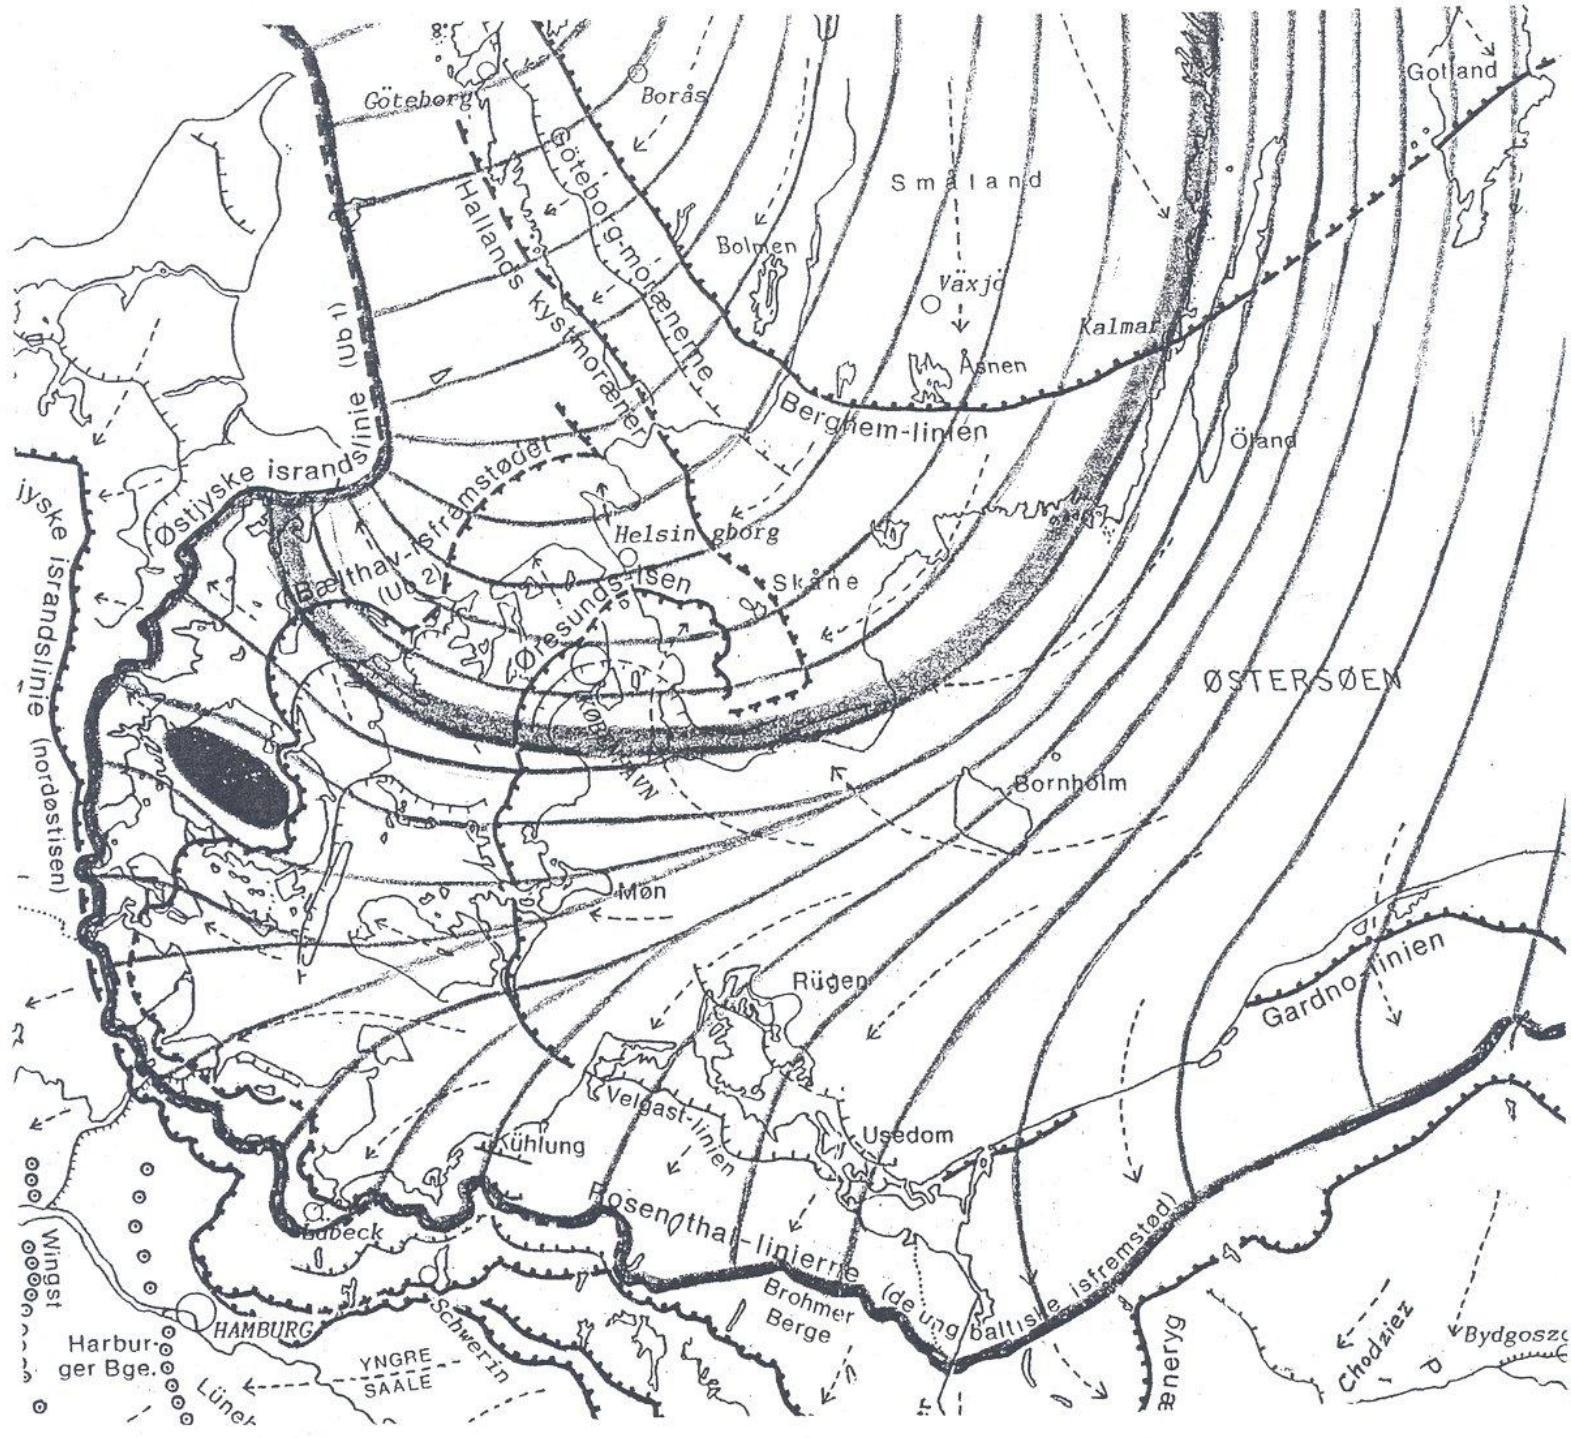

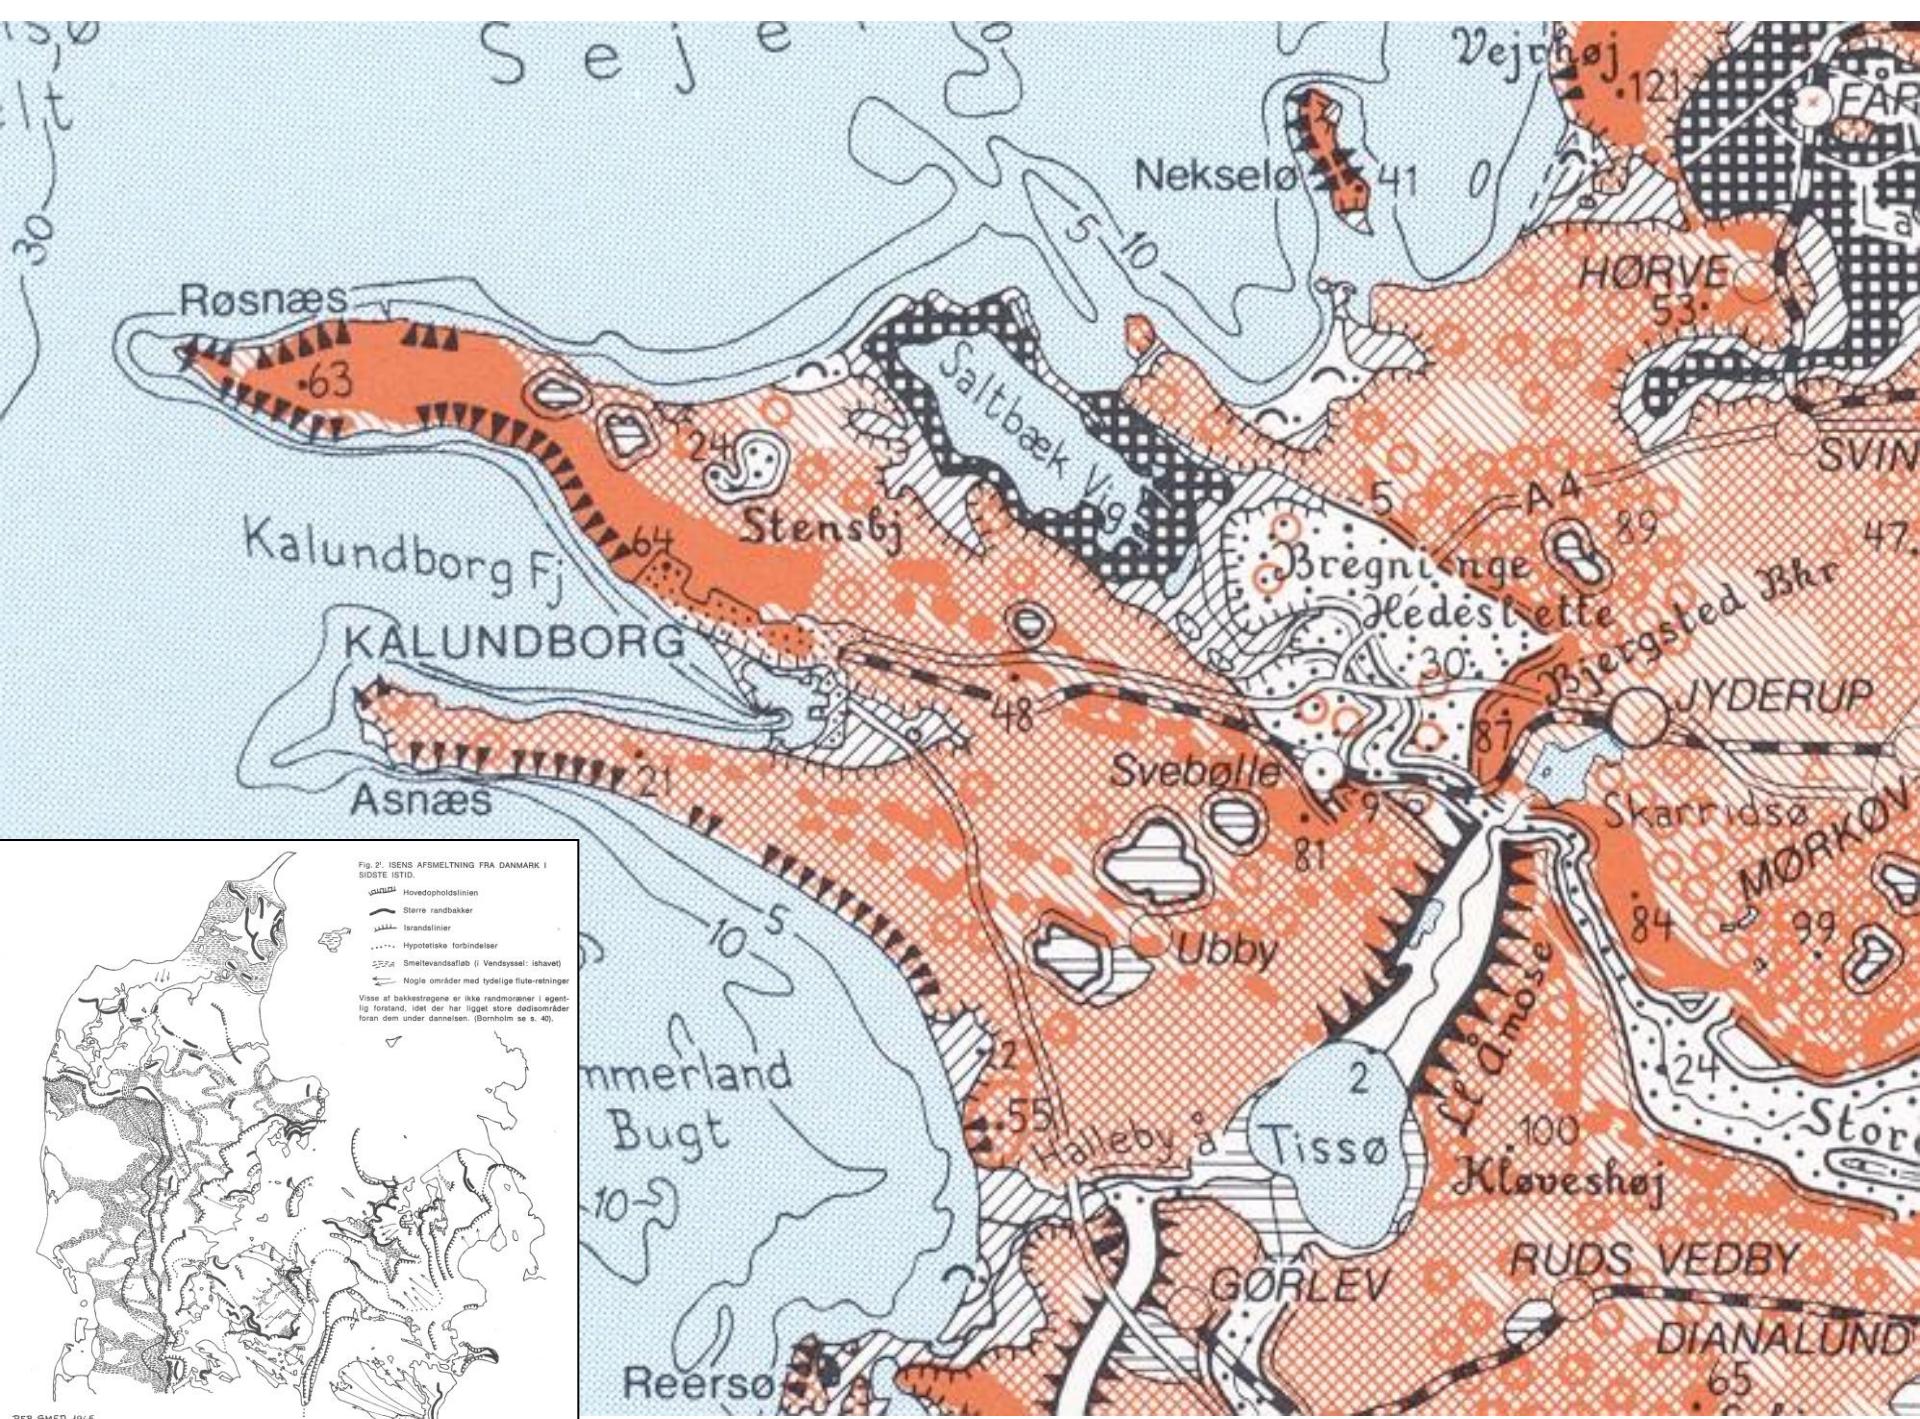

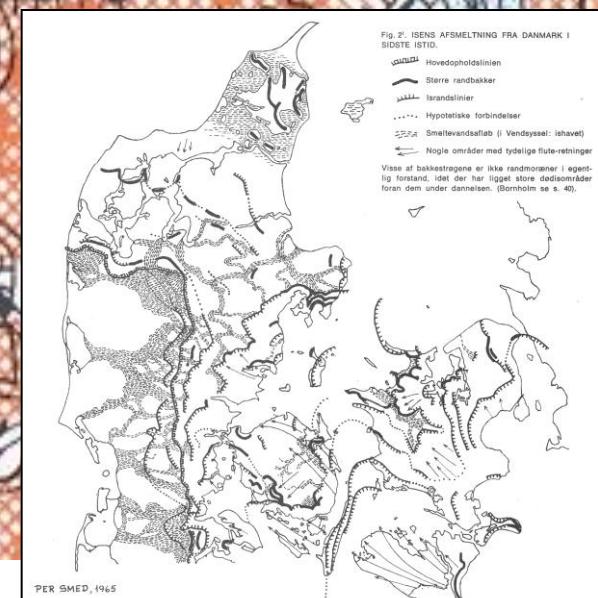

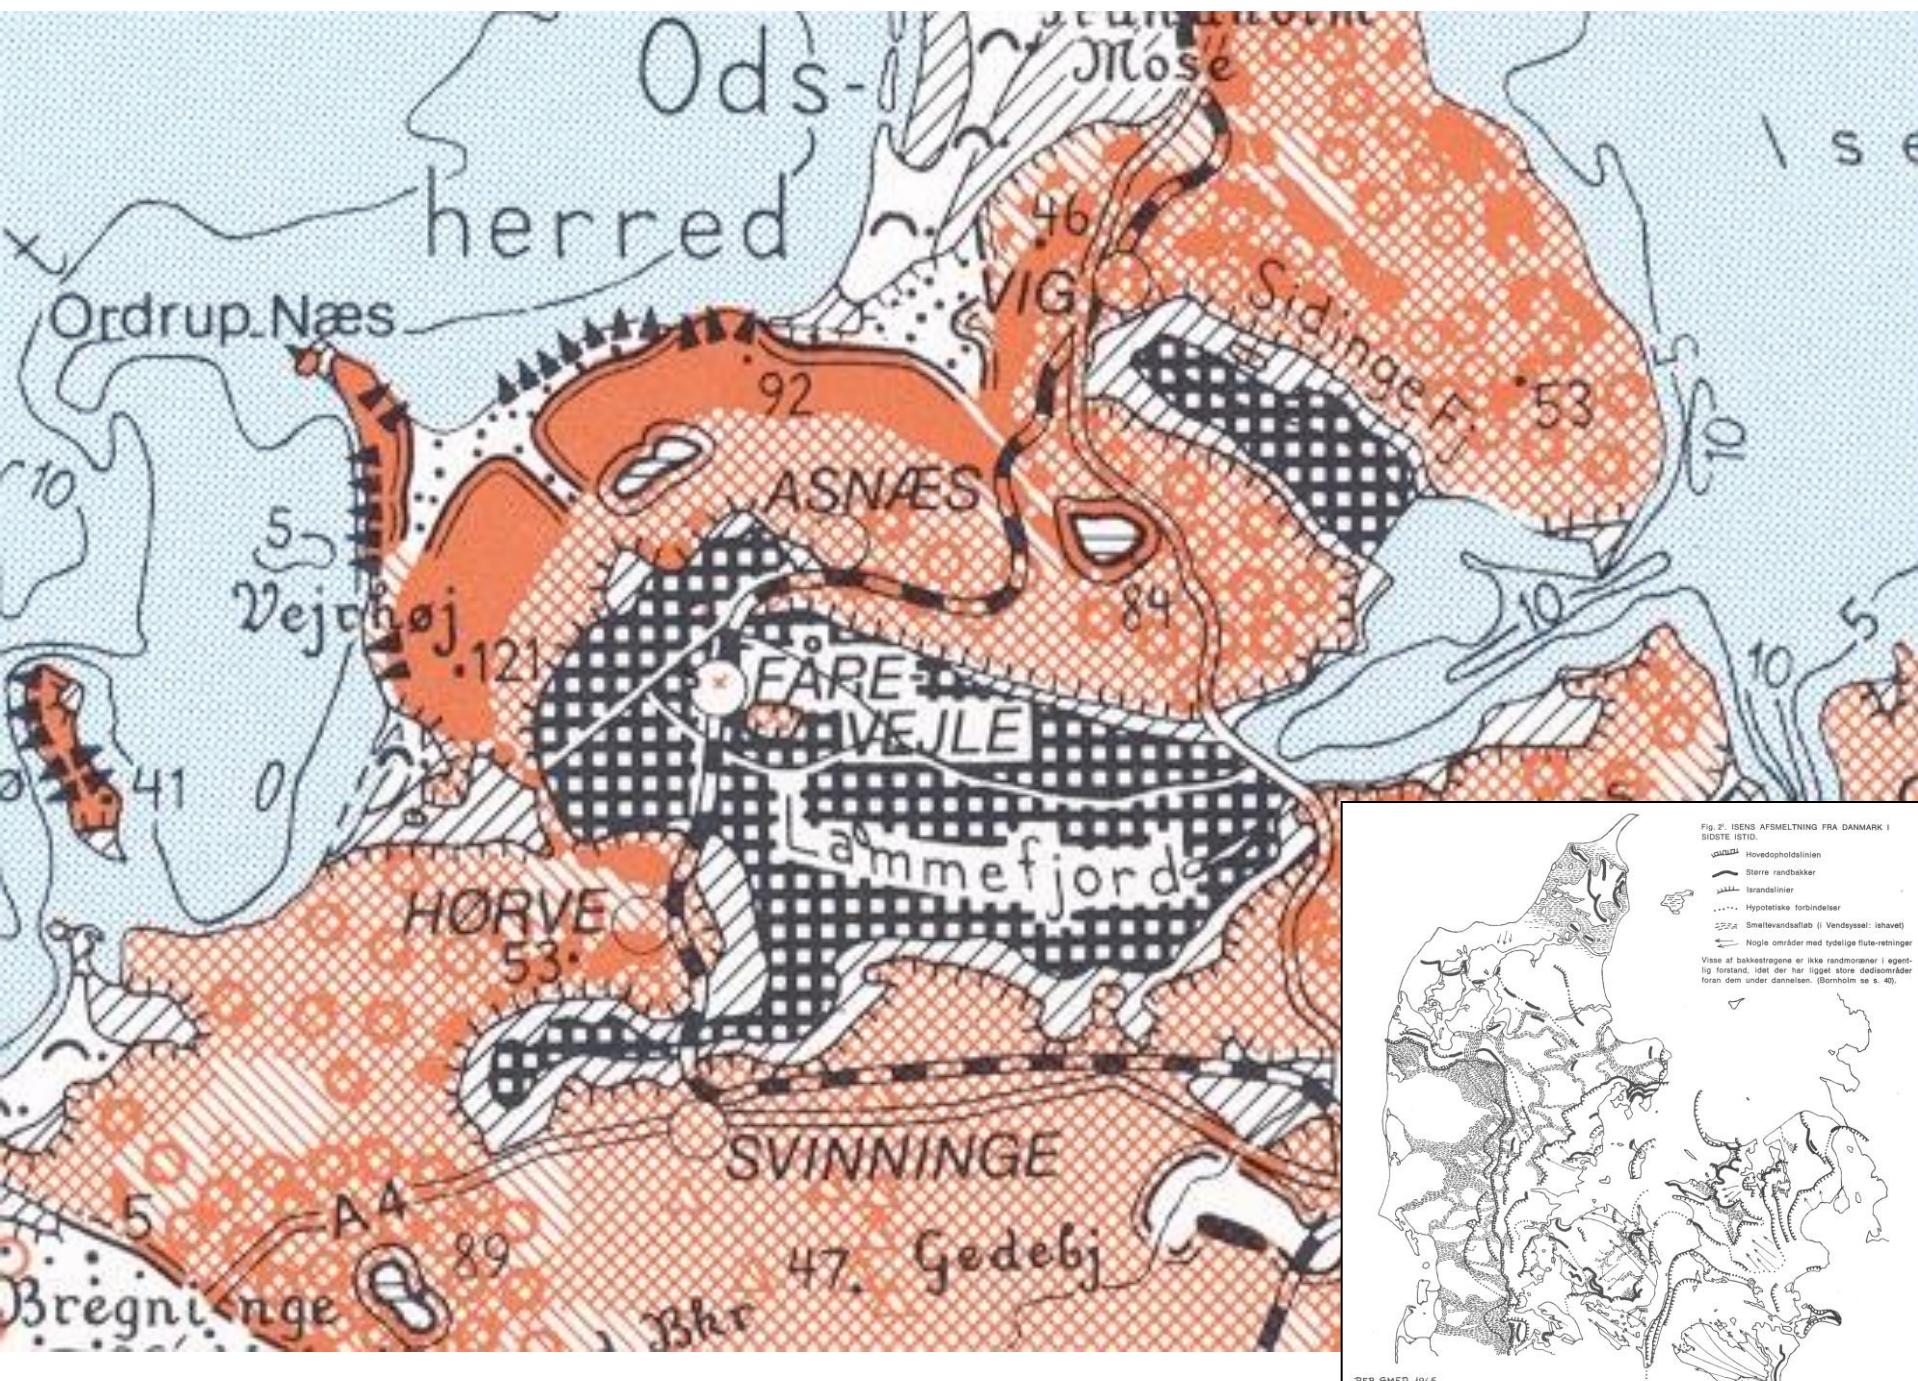

Moraines

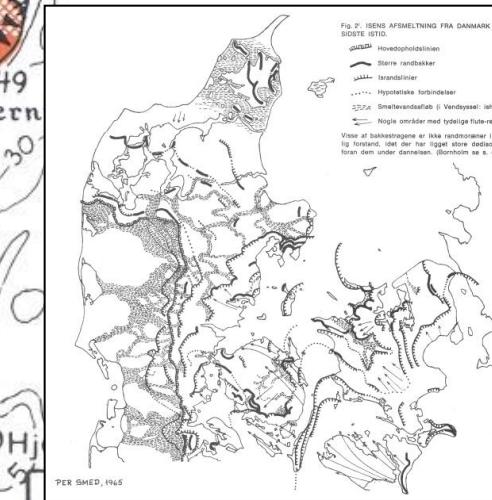

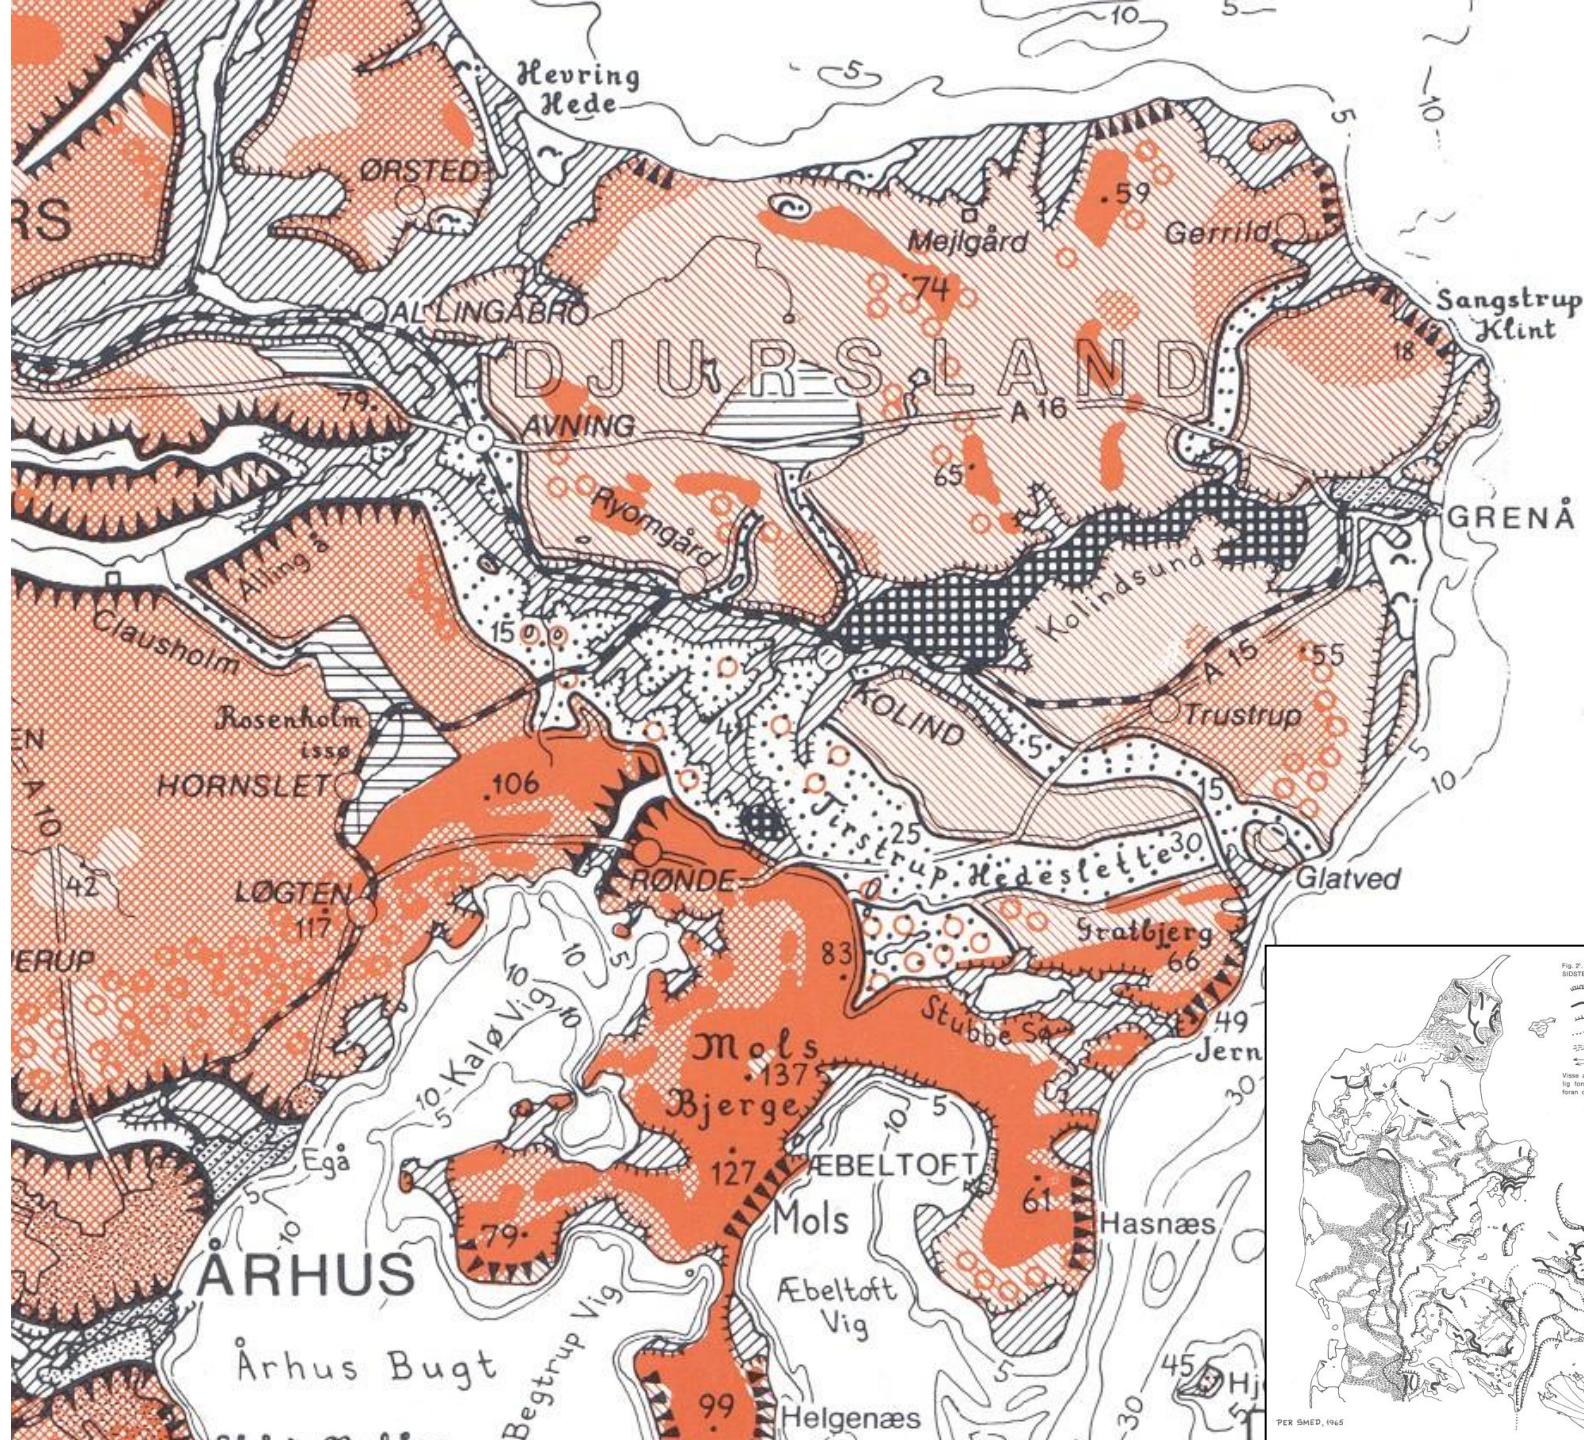

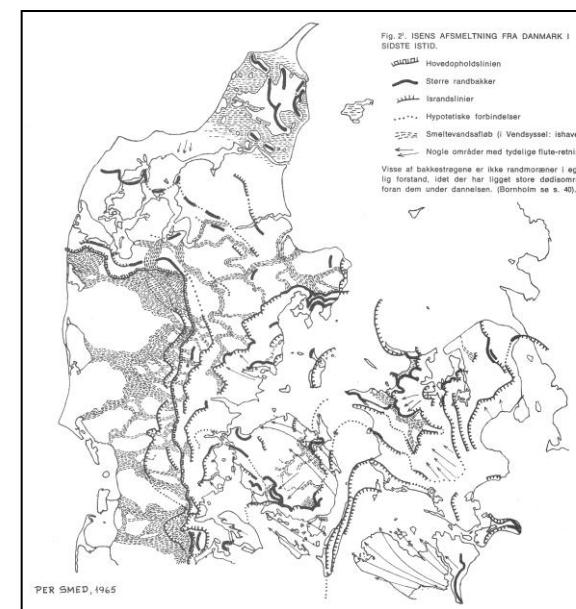

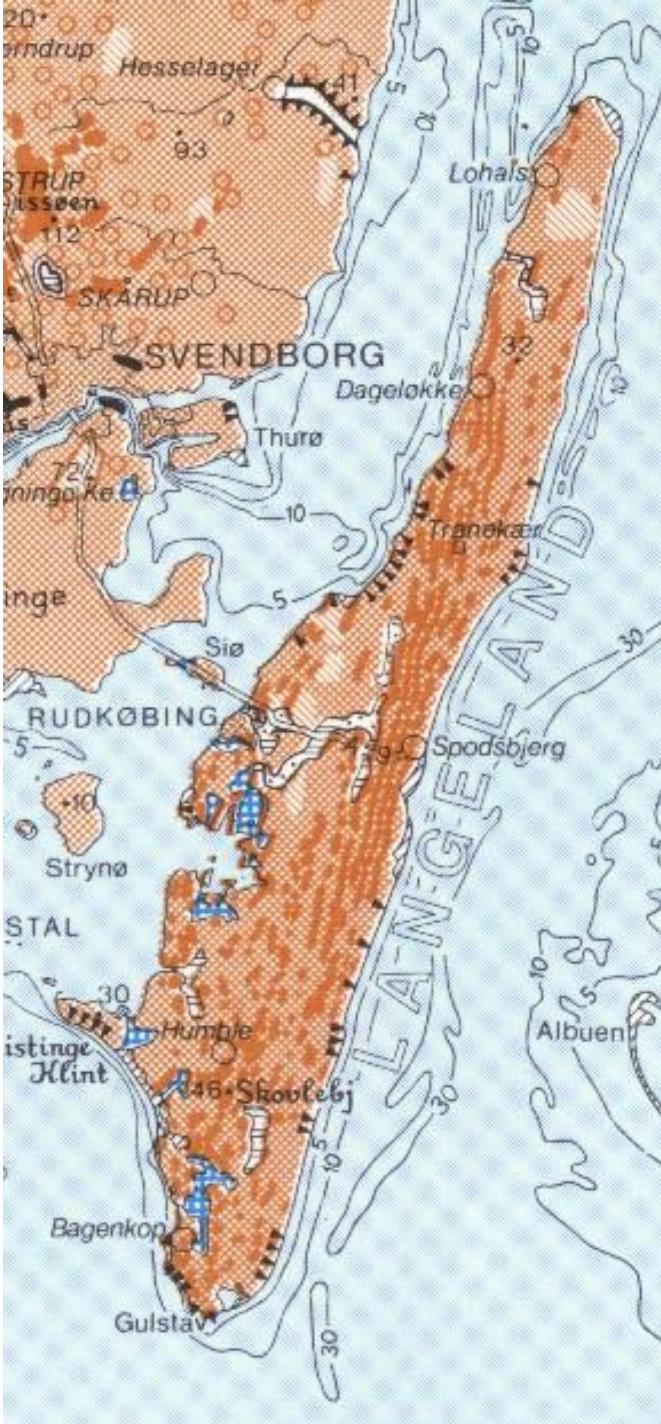

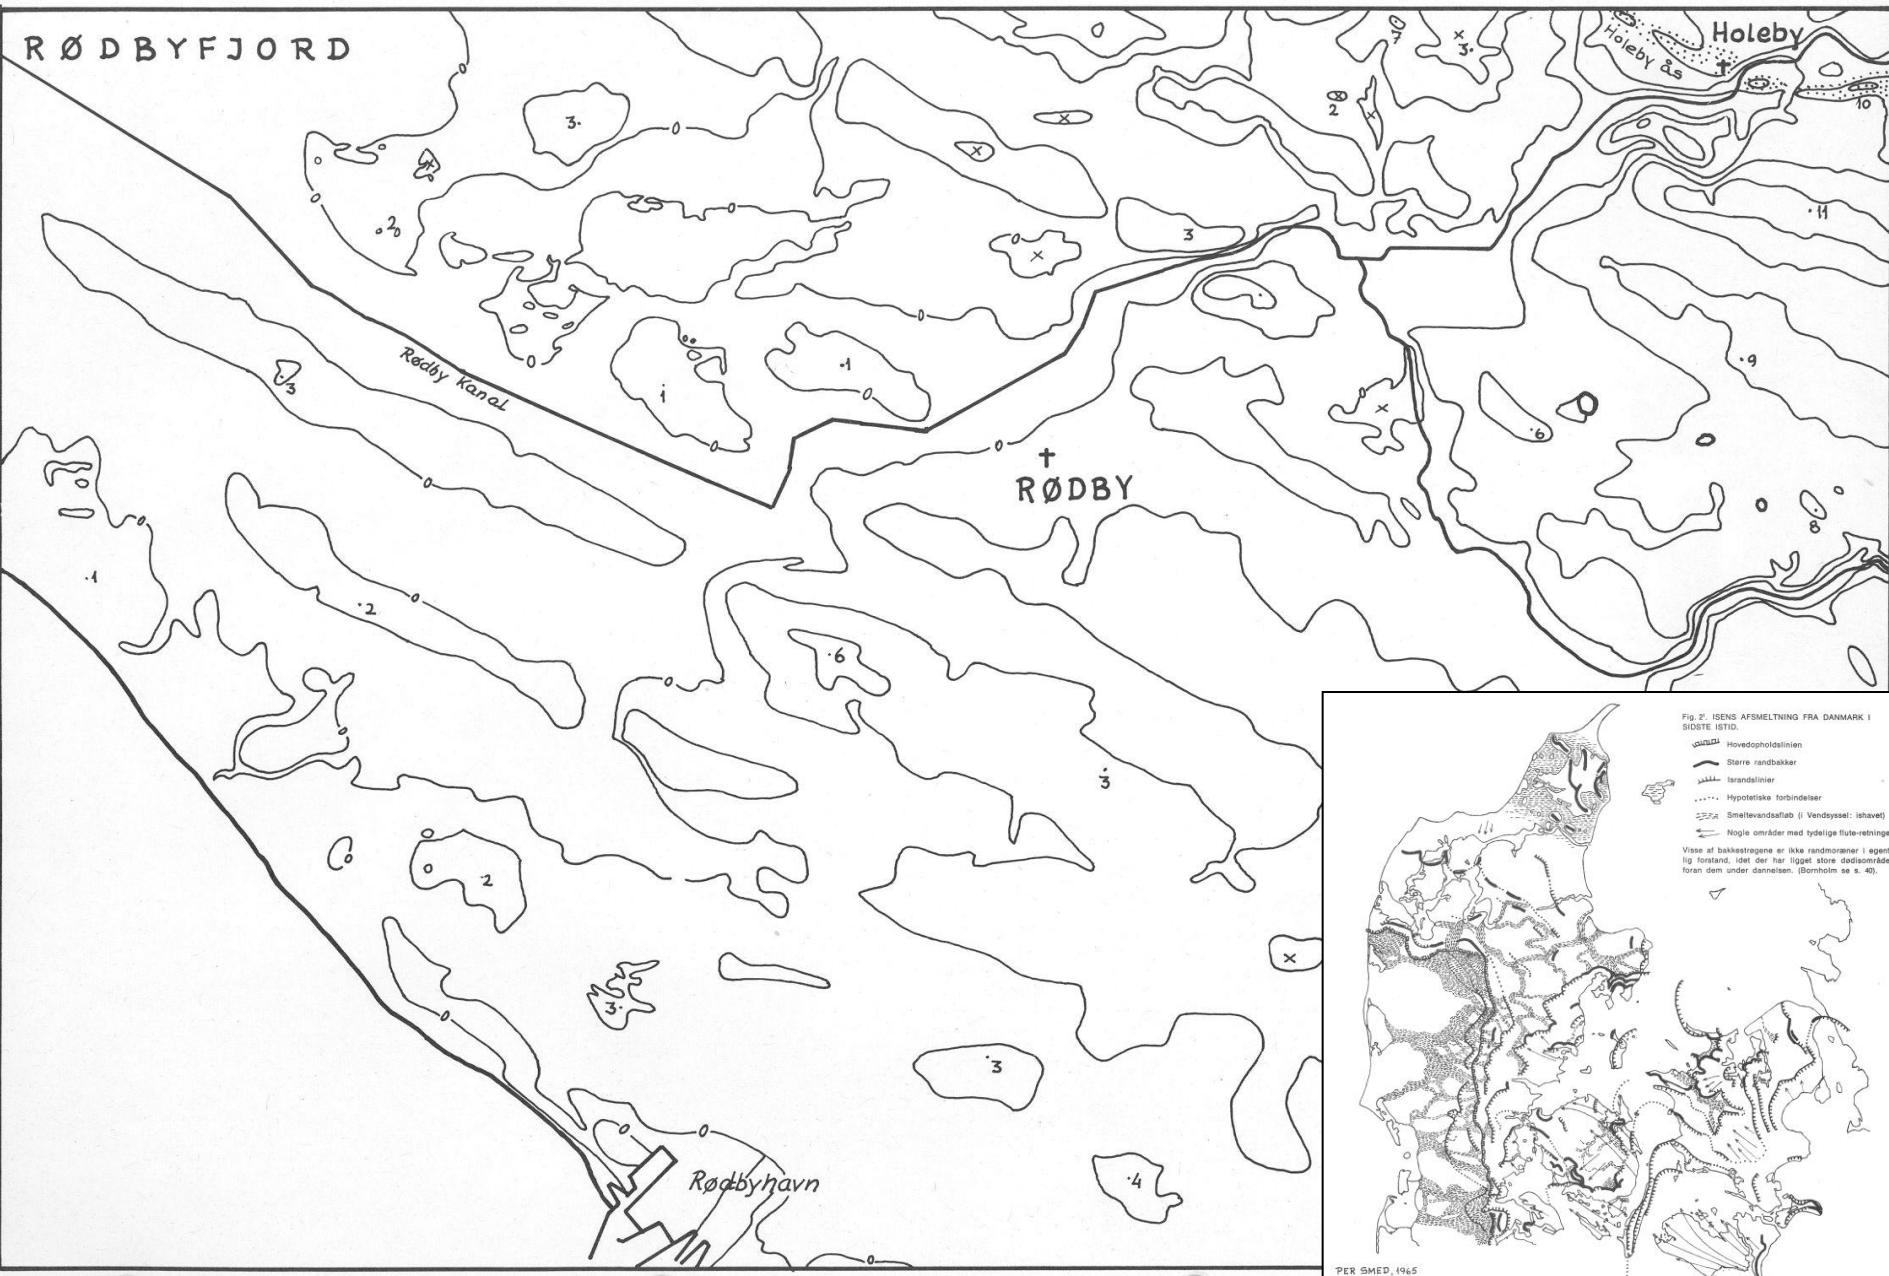

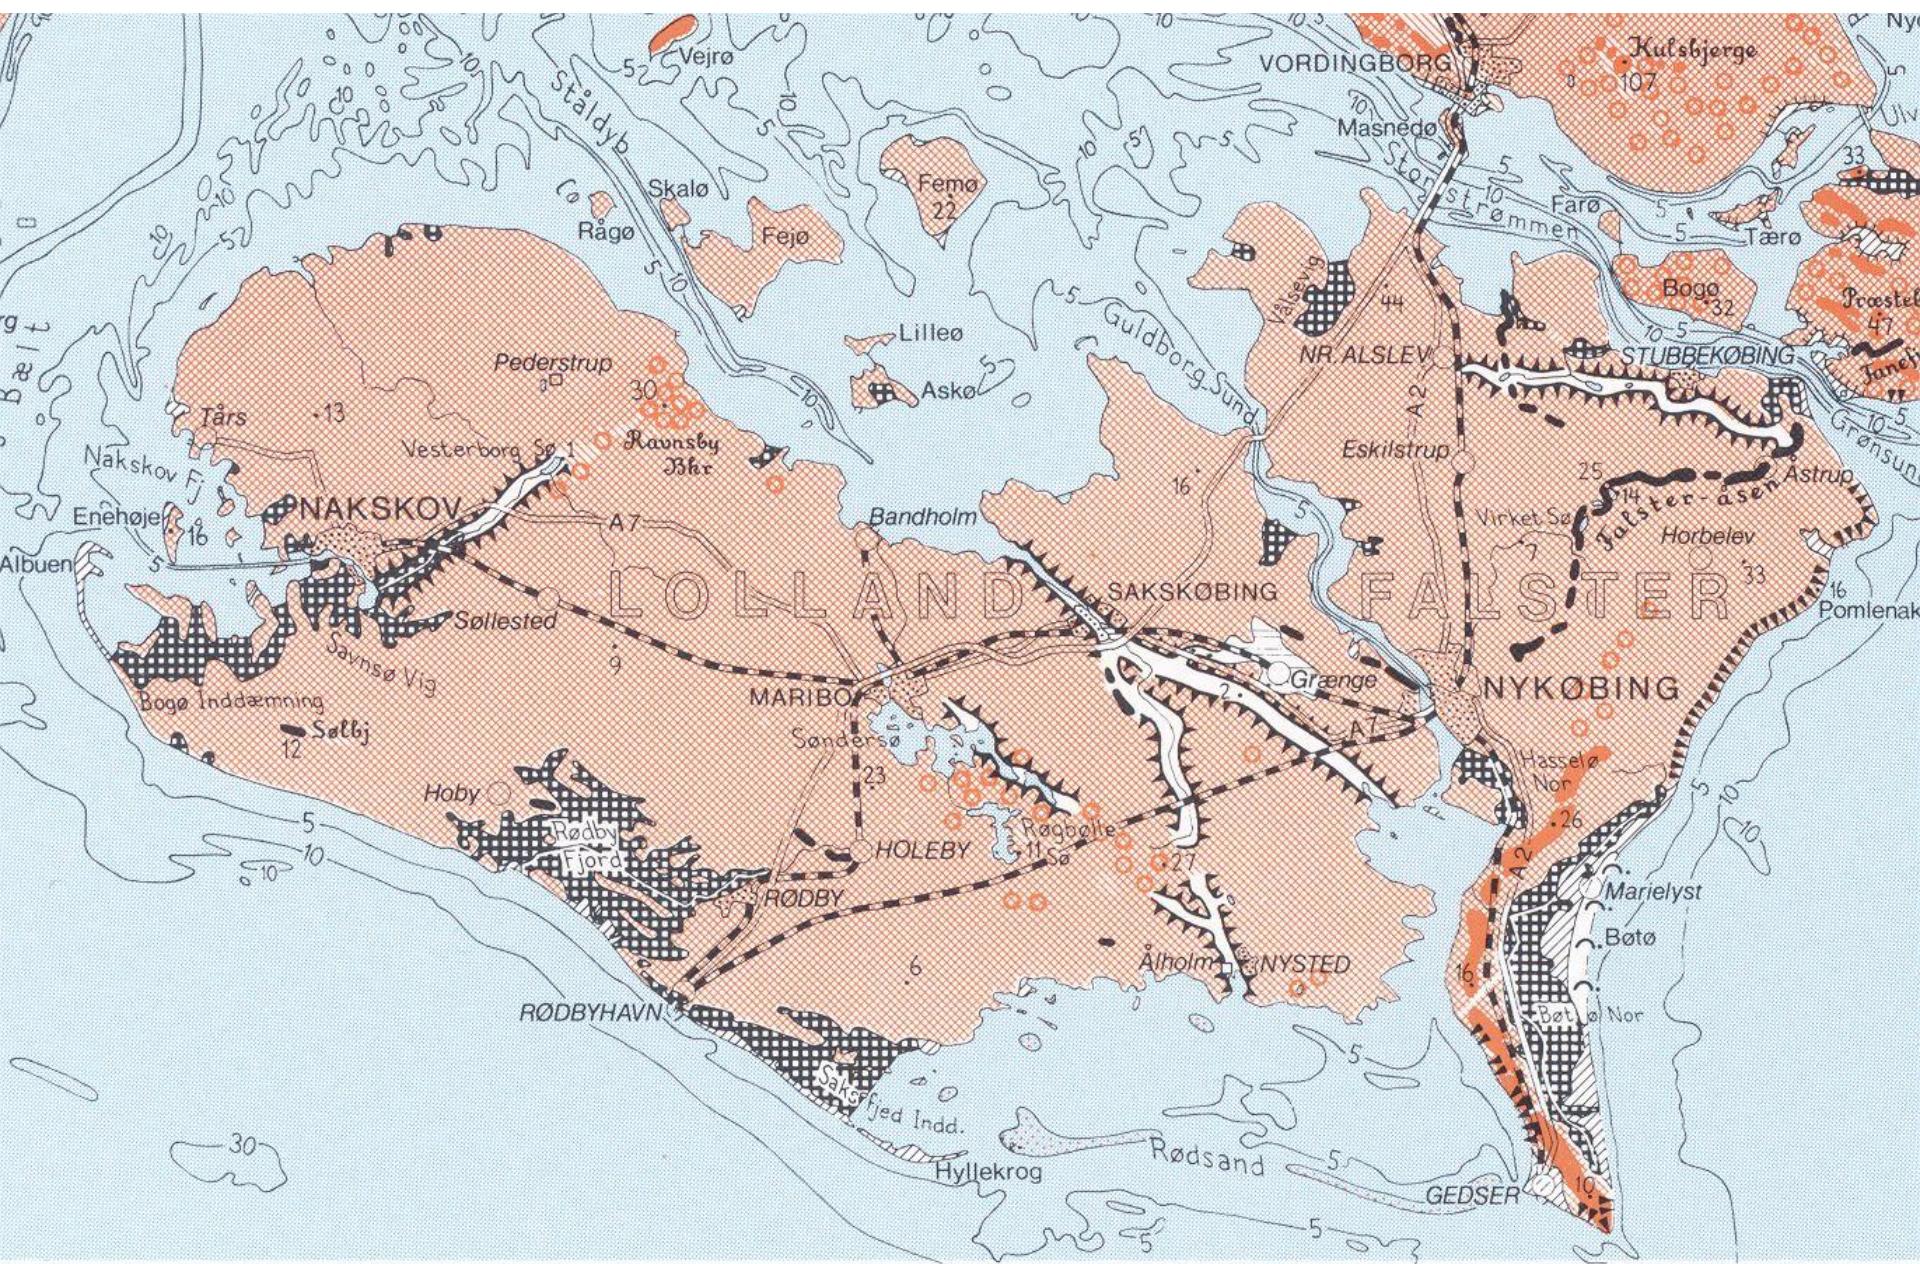

Till plains

Kame hills

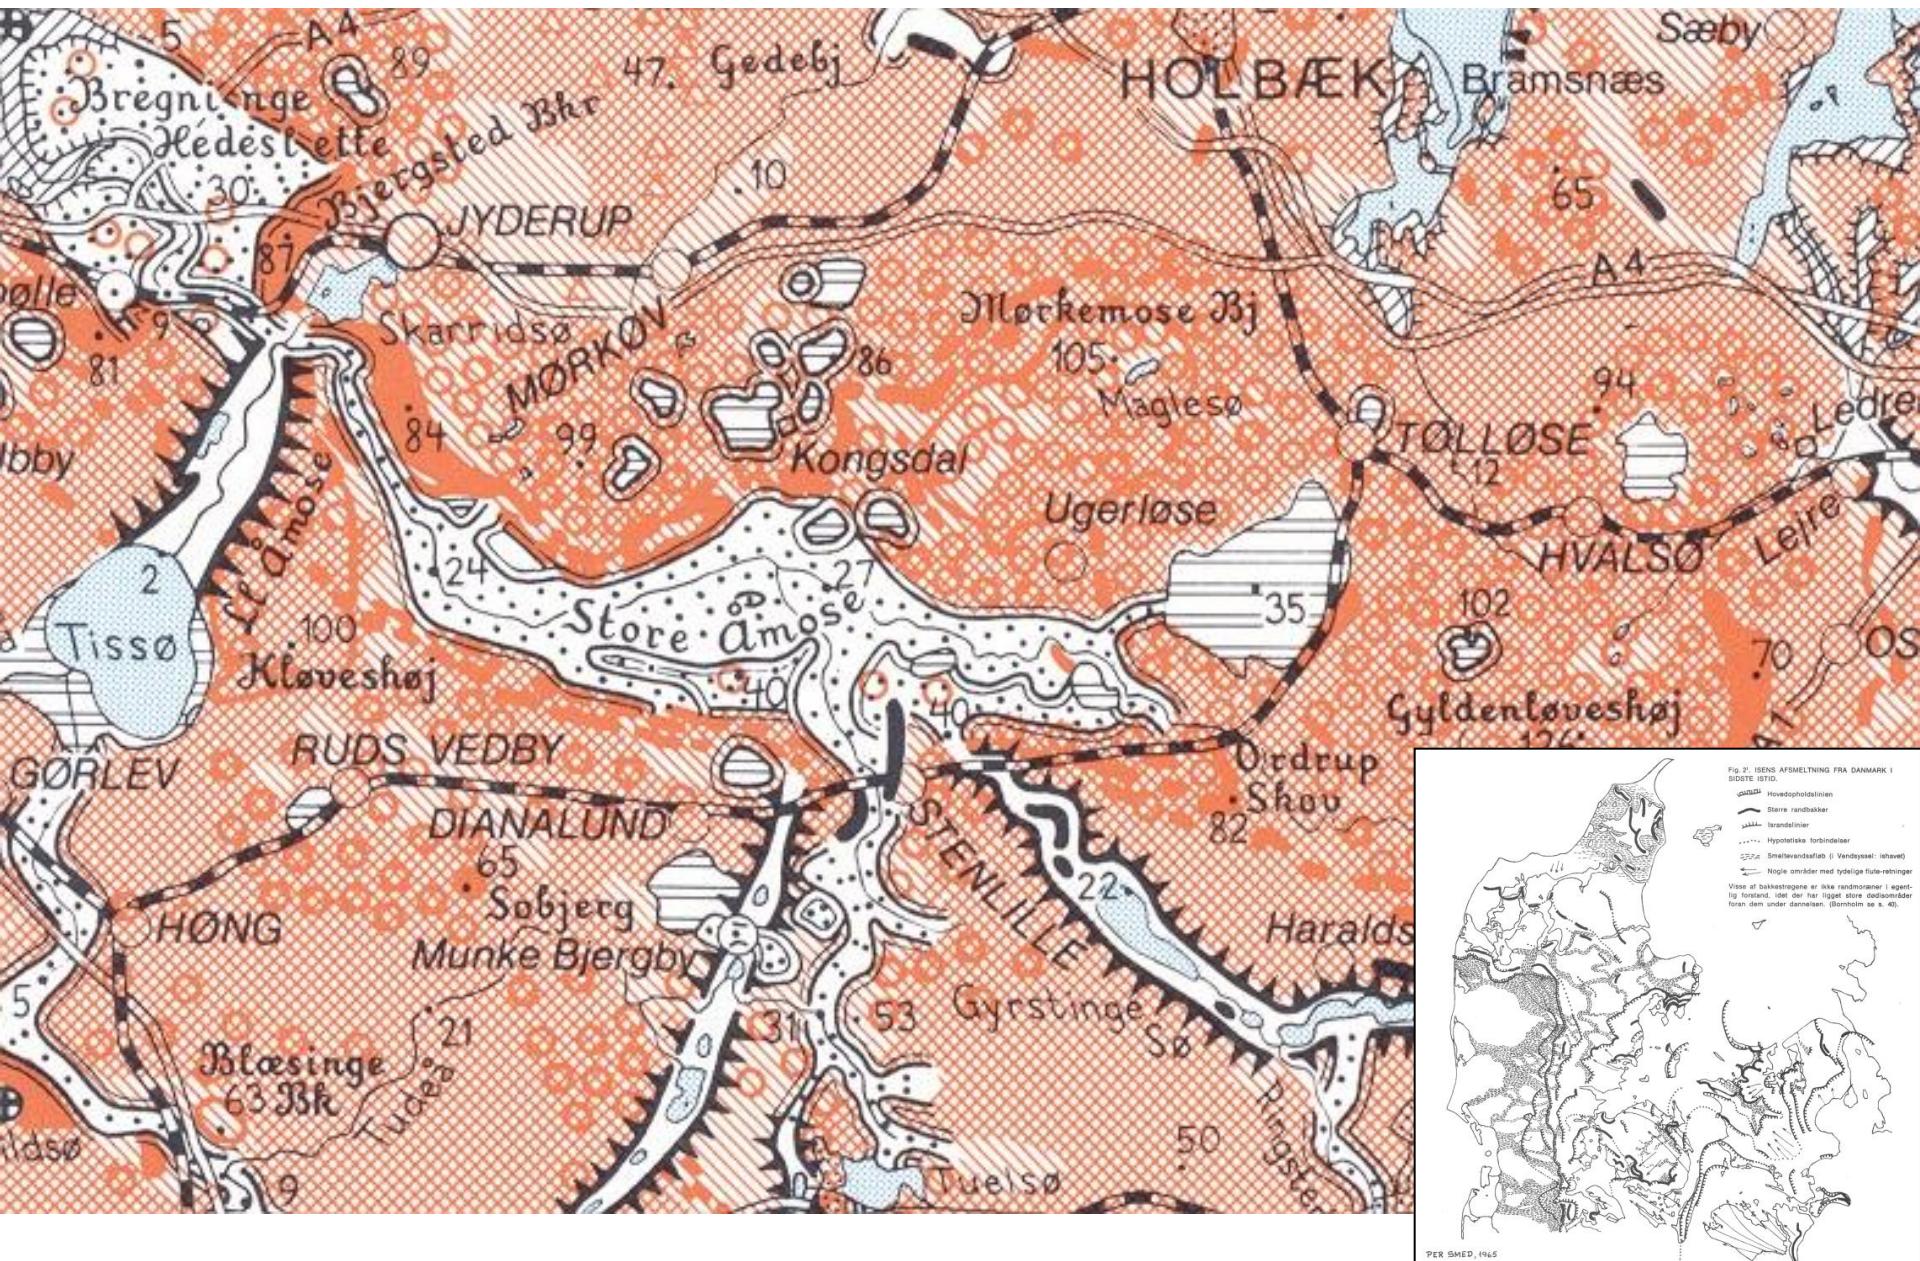

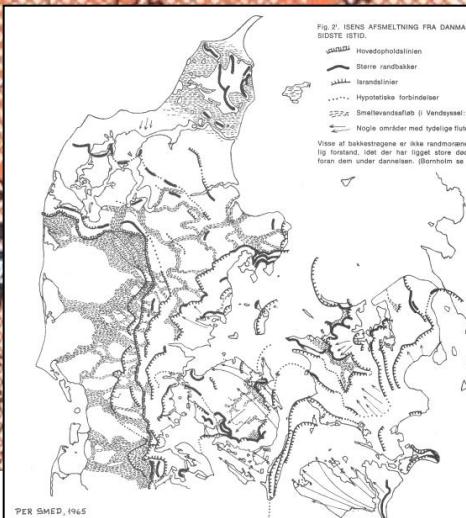

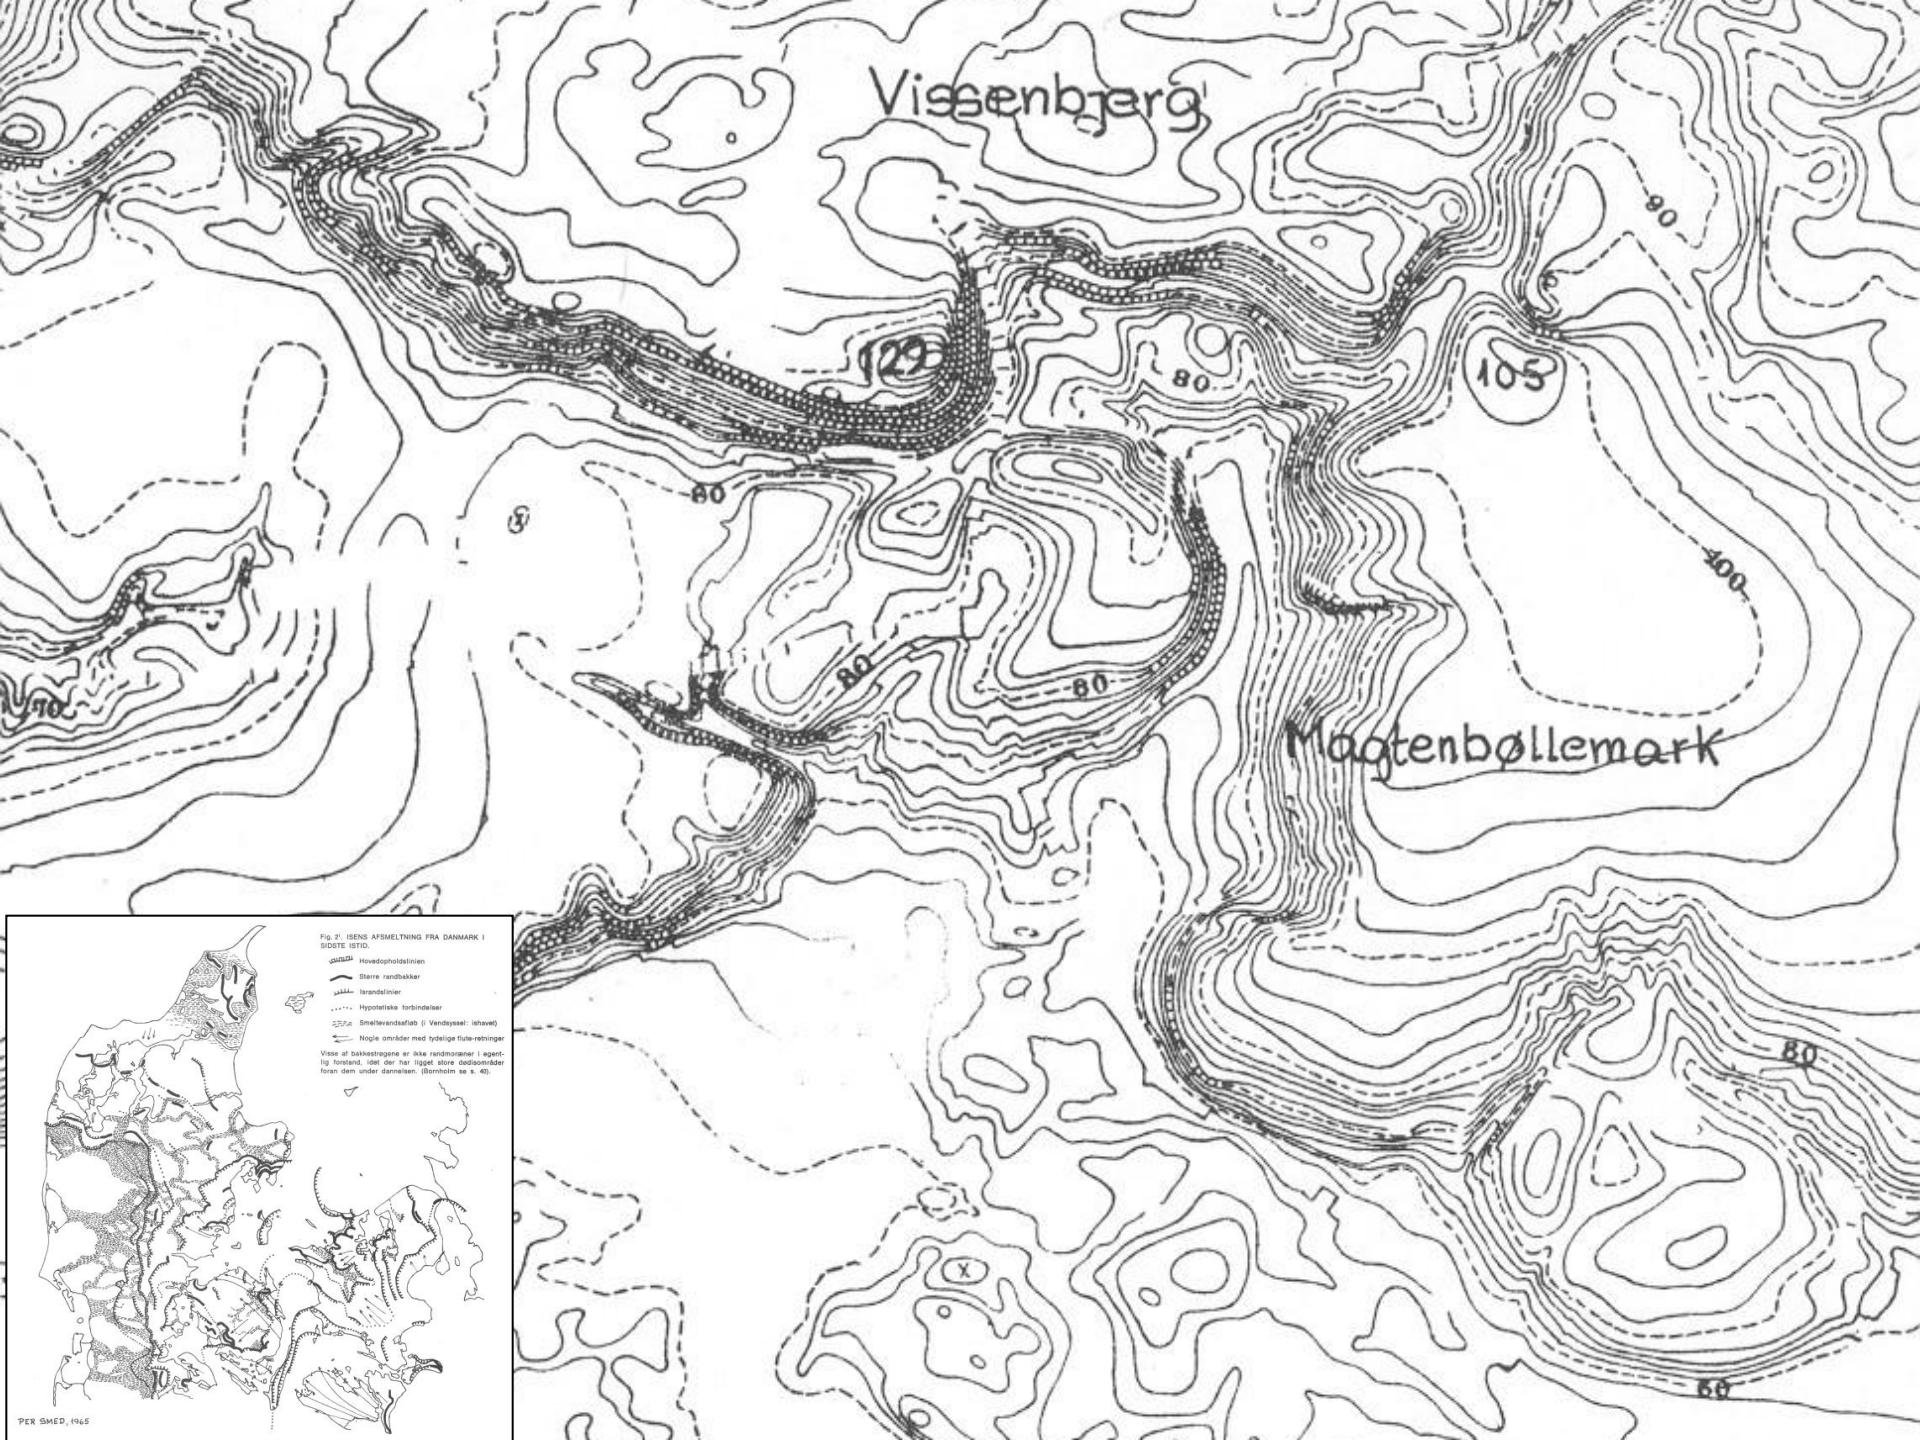

Fig. 2. IBERNS AFMELTNING FRA DENMARK I
SIESTE ISTID.
 ● Hovedopholdslinien
 — Større randbakkar
 - - Israndslinier
 ... Hypotetiske forbindelser
 □ Smeltevandsfælt (I Vendsyssel: ihvervet)
 → Nogle områder med tydelige flote-retninger
 Visse af bækrestogene er ikke randmoriner i egentlig forstand, idet der har ligget store dædemærke foran dem under den seneste. (Bemerk se s. 40).

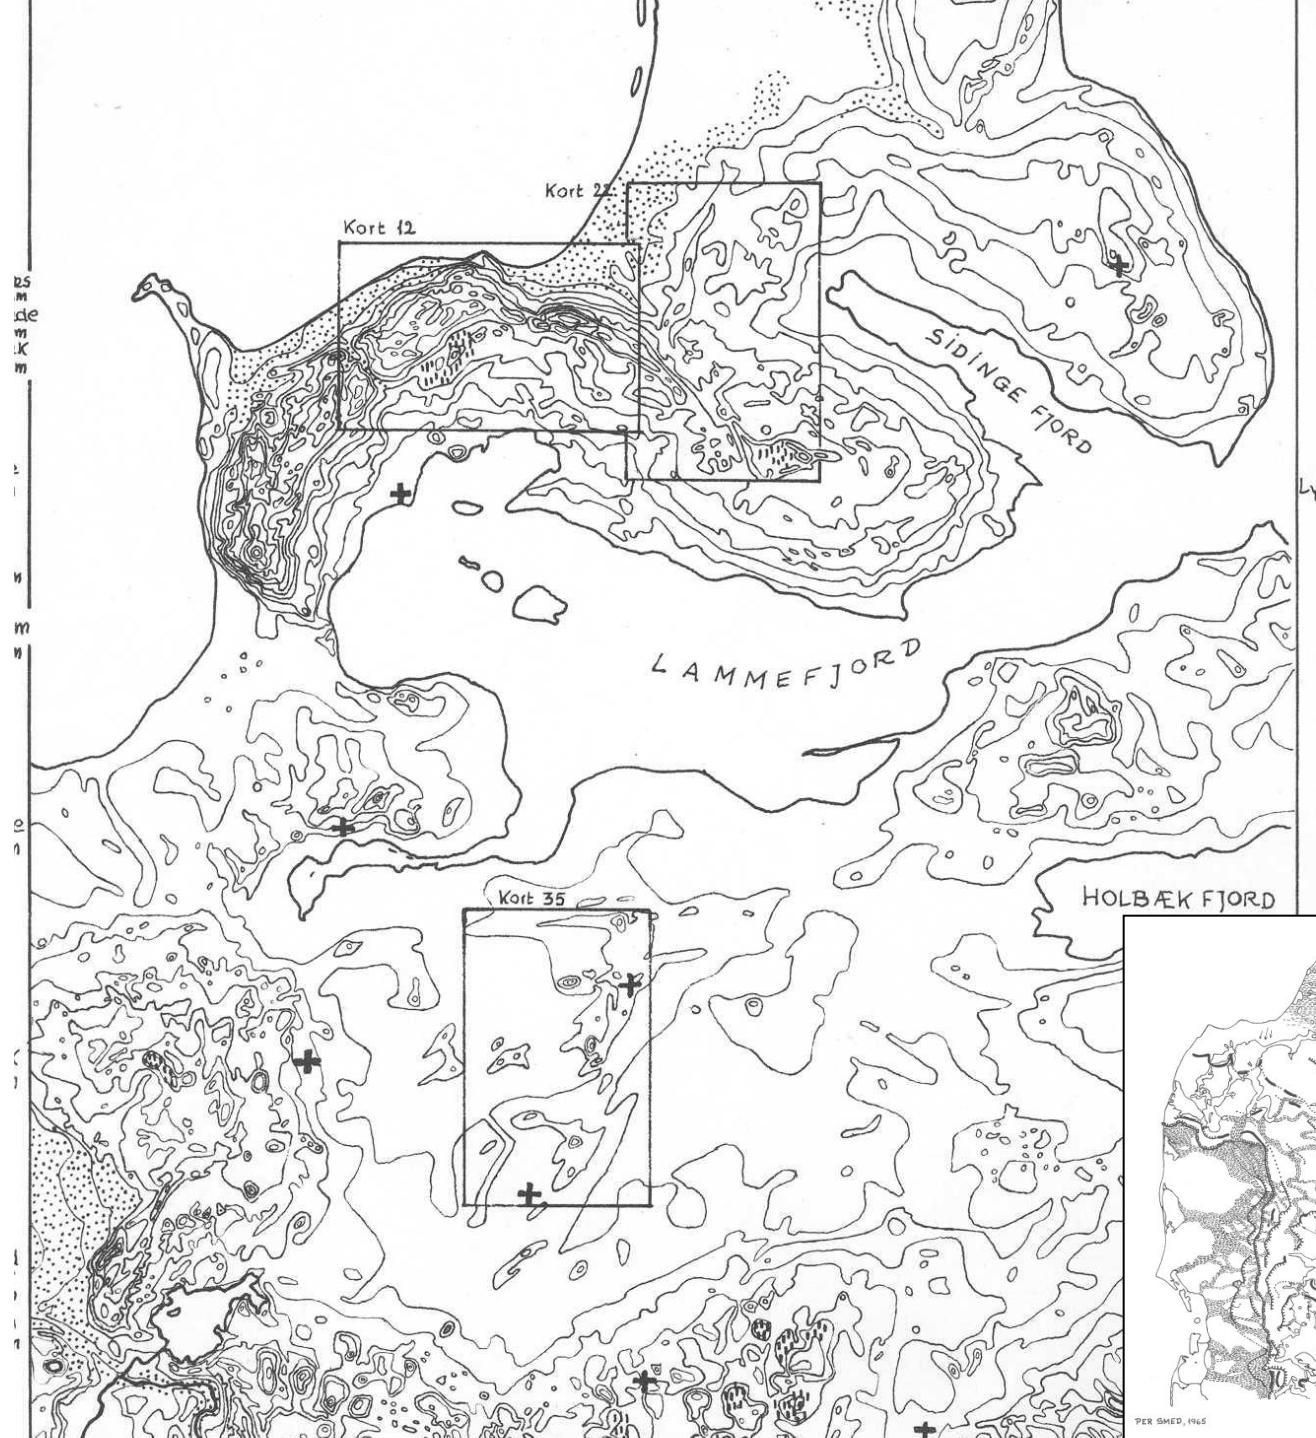

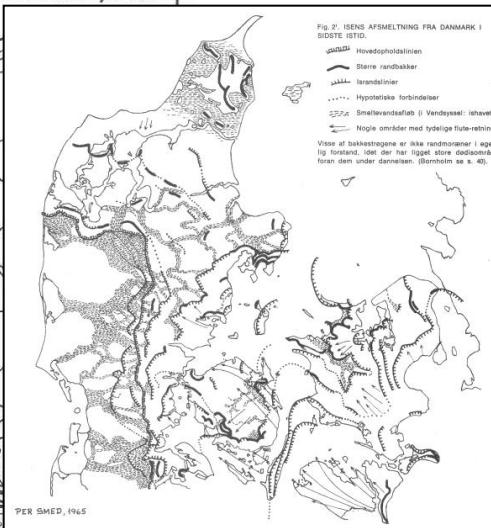

Fig. 2. ISENS AFSMELTNING FRA DANMARK I
SISTE ISTO.

- Hovedopholdslinien
- Sterre randbakkier
- Israndslinier
- Hypotetiske forbindelser
- Smeltevandsfødt (i Vendysælt: ihvevet)
- Nøgle områder med tydelige flote-retninger

Vise af bakkestropene er ikke randmærker i egentlig forstand, idet der har ligget store dækkområder foret dem under denneisen. (Bemærk se s. 40).

Hatt formed hills

Eskers

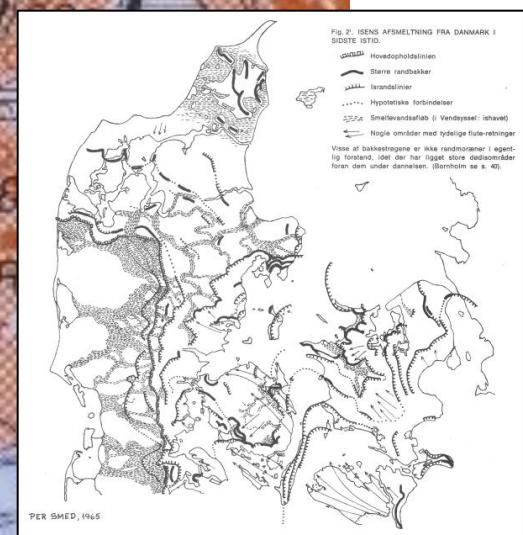

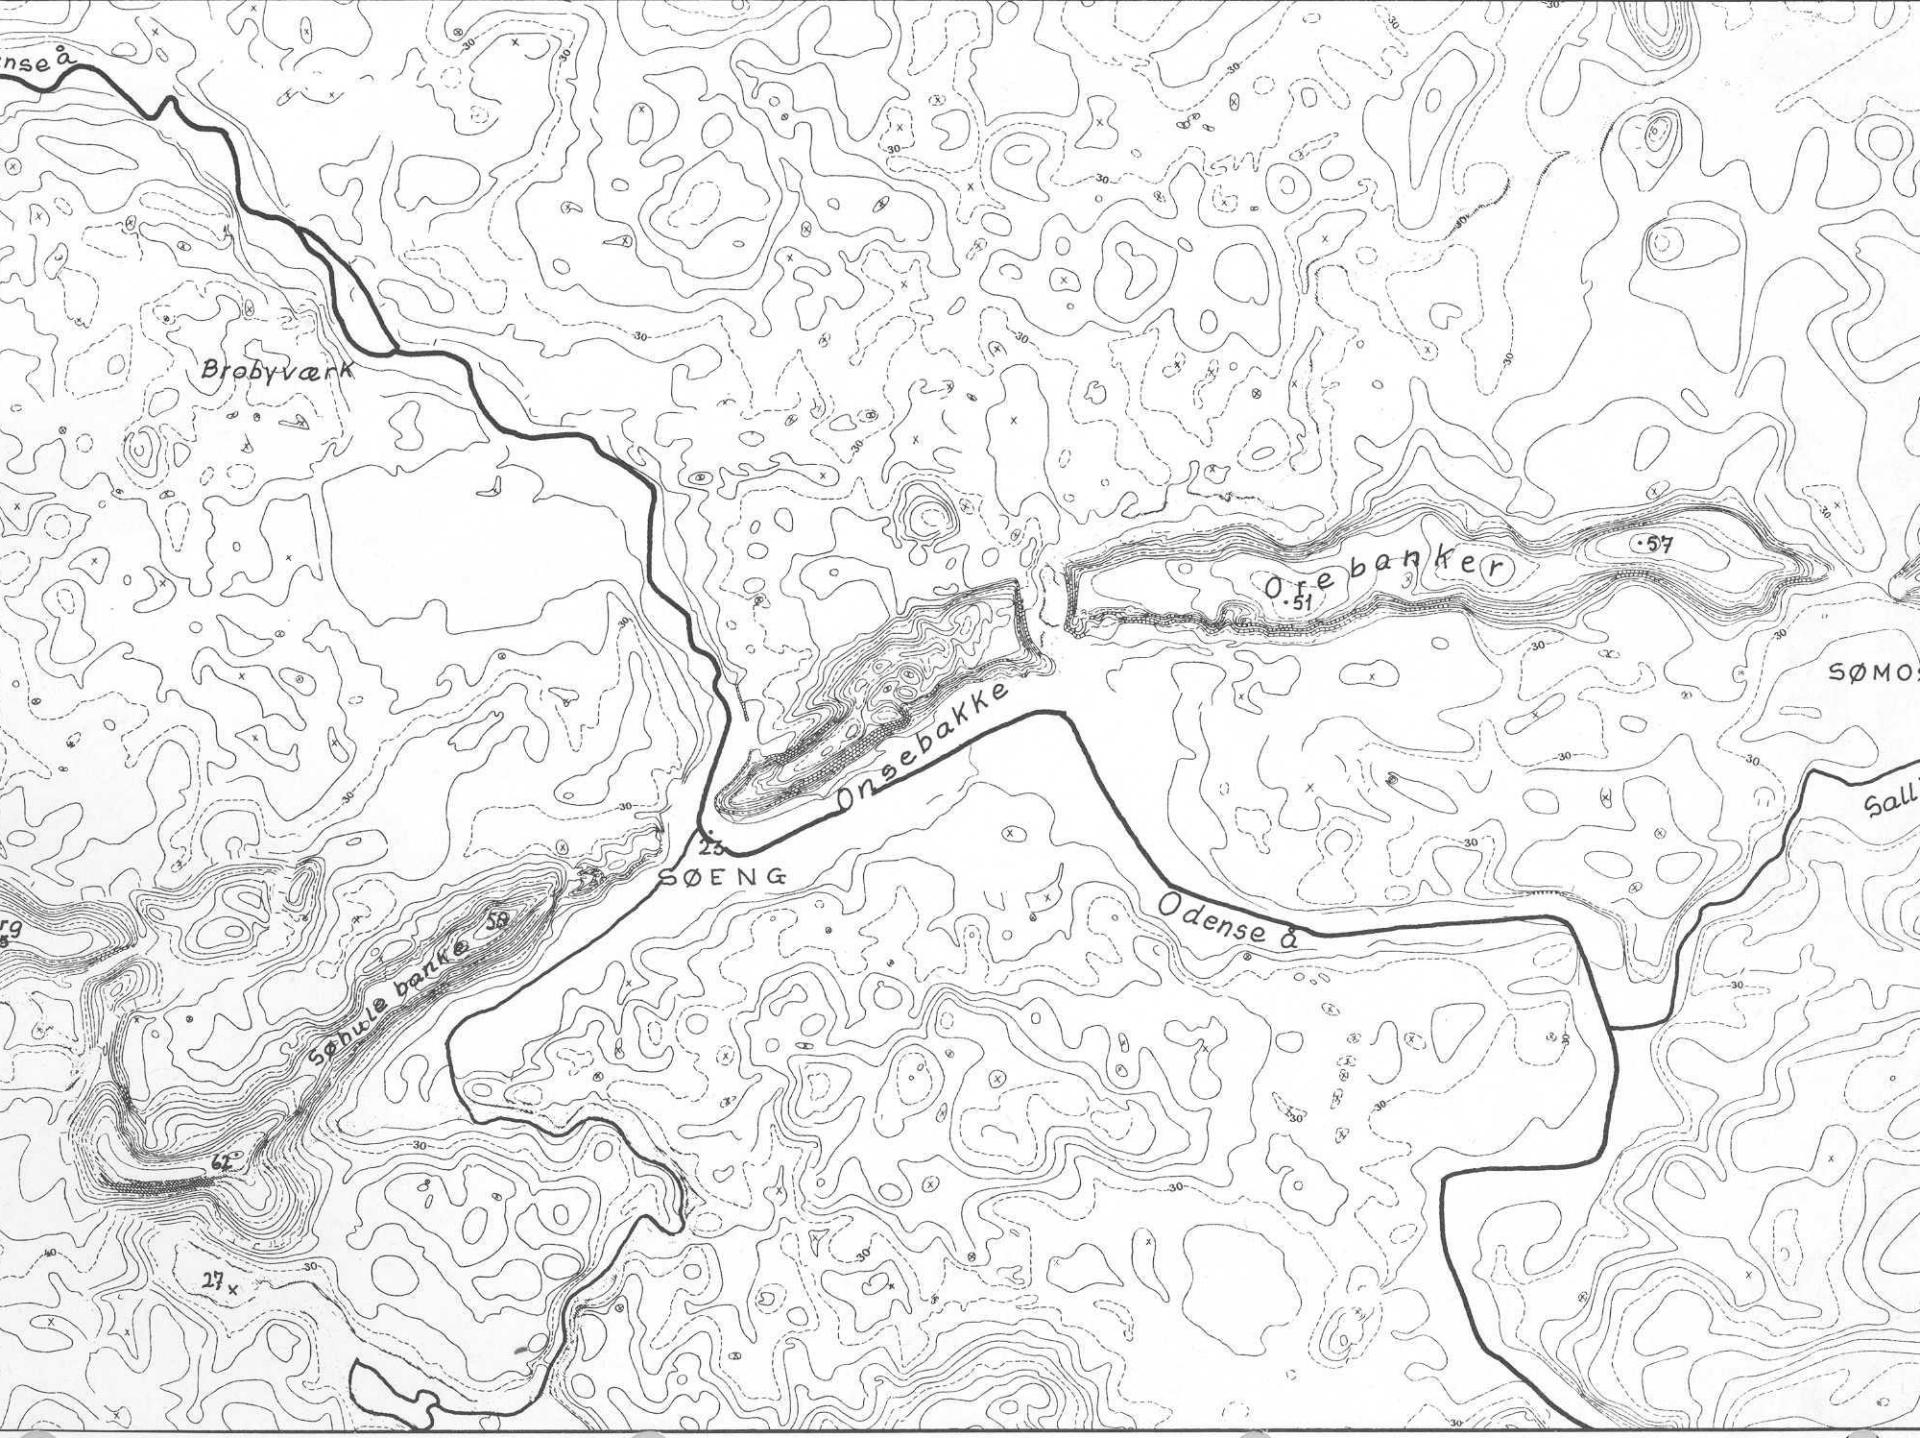

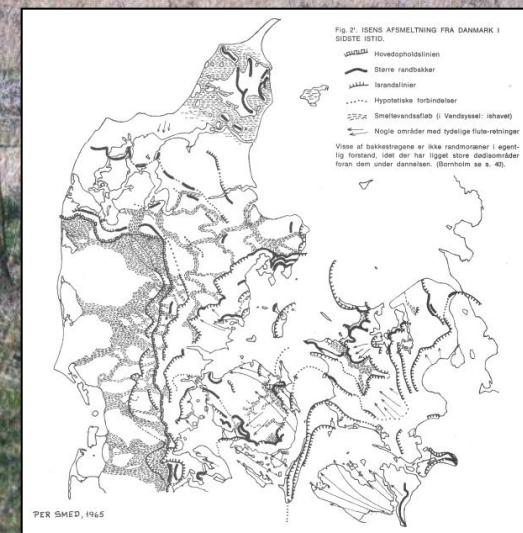

Fig. 2. IBSNS AFSMELTNING FRA DANMARK I SISTE ISSTID.

- Hovedopholdslinien
- Større randbakkar
- Indendeliner
- Hypotetiske forbindelser
- Smeltevandsfødt (Vendysælt; ihvejet)
- Nogle områder med tydelige flote-retninger

Vise af bækkesystemene er ikke randomiseret i egentlig forstand, idet der har ligget store dædelområder foren dem under denne is. (Bemærk se s. 40).

ebakke

Tunnel valleys

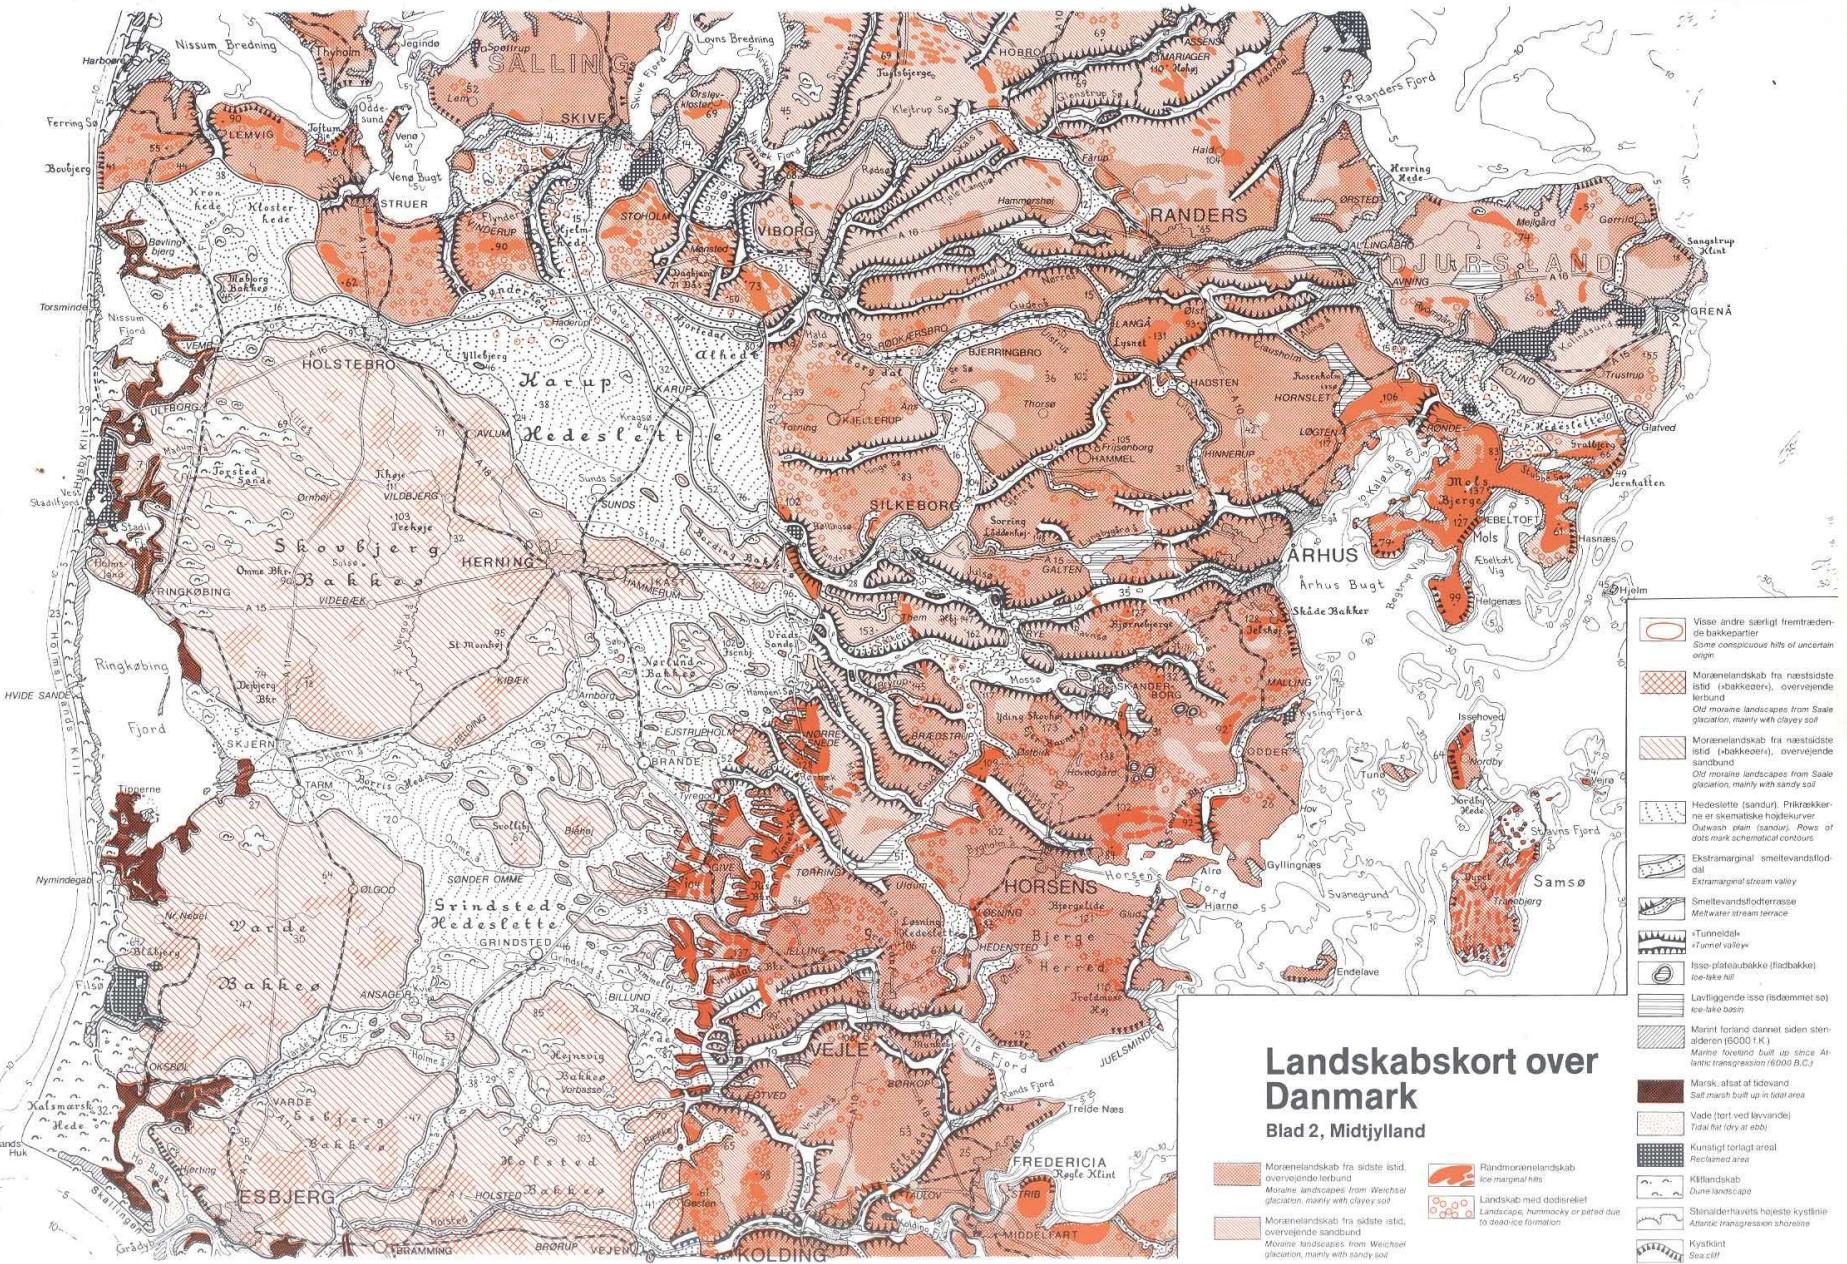

Fig. 2. ISENS AFSMELTNING FRA DANMARK I
SISTE ISTO.

- Hovedafvandsfløb (i Vendsyssel: ihvervet)
- Sterre randbækker
- Iarandelinier
- Hypothetiske forbindelser
- Smeltevandsstrøm (i Vendsyssel: ihvervet)
- Nogle områder med tydelige fløde-retninger

Væske af bækstropene er ikke randområder i egentlig forstand, idet der har ligget store dækkende områder over dem under den isen. (Bemærk se s. 40).

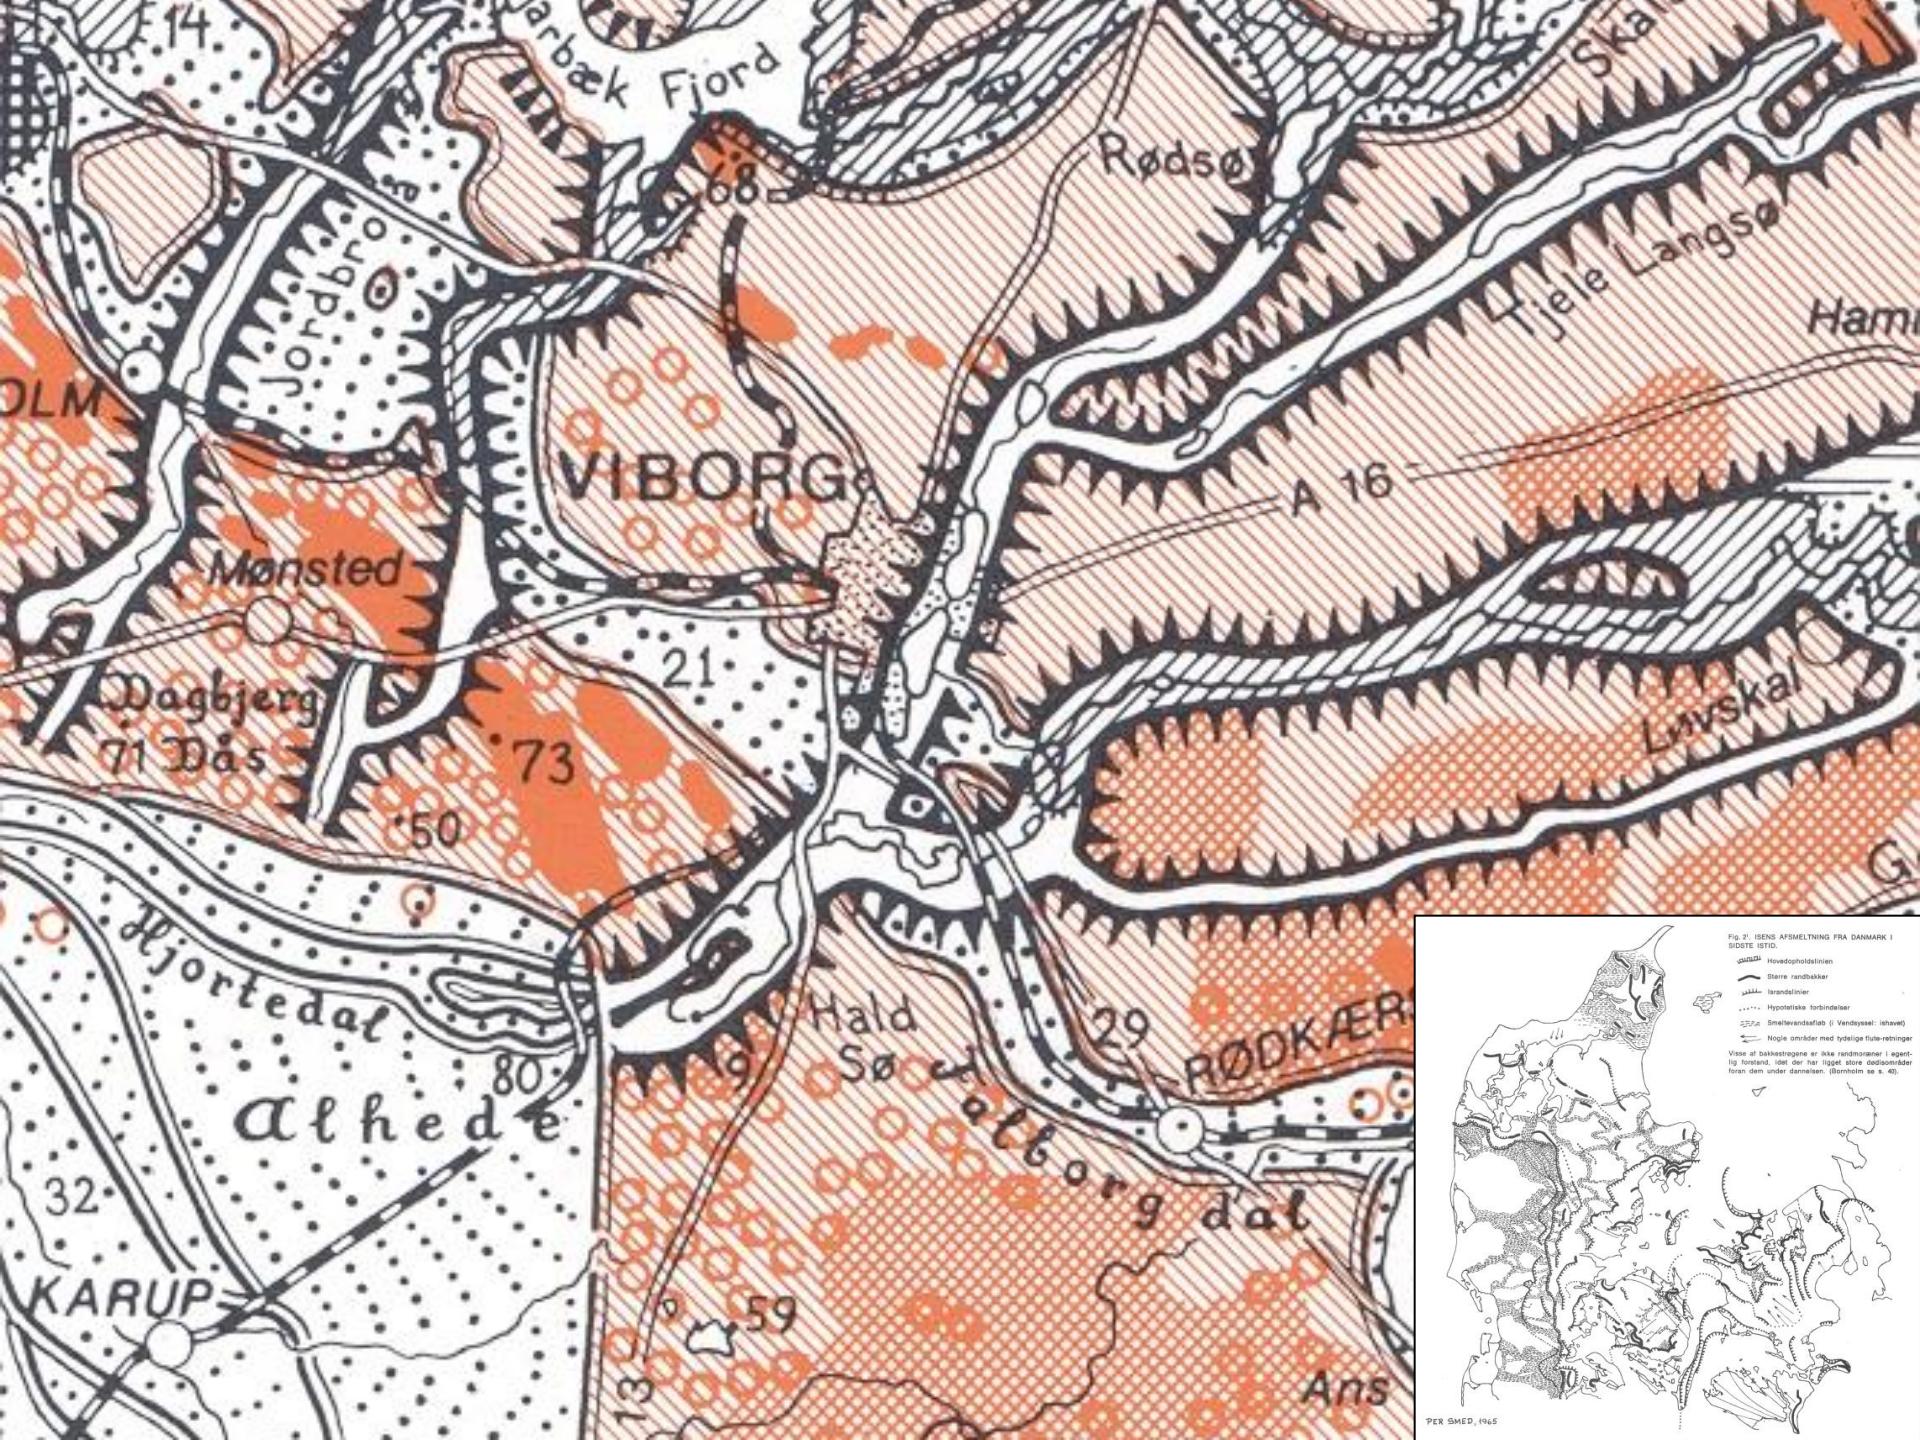

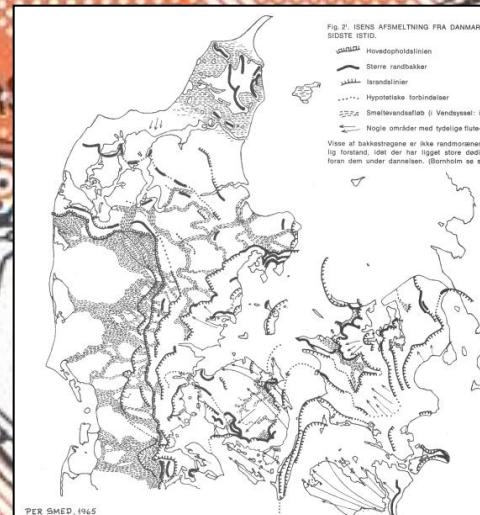

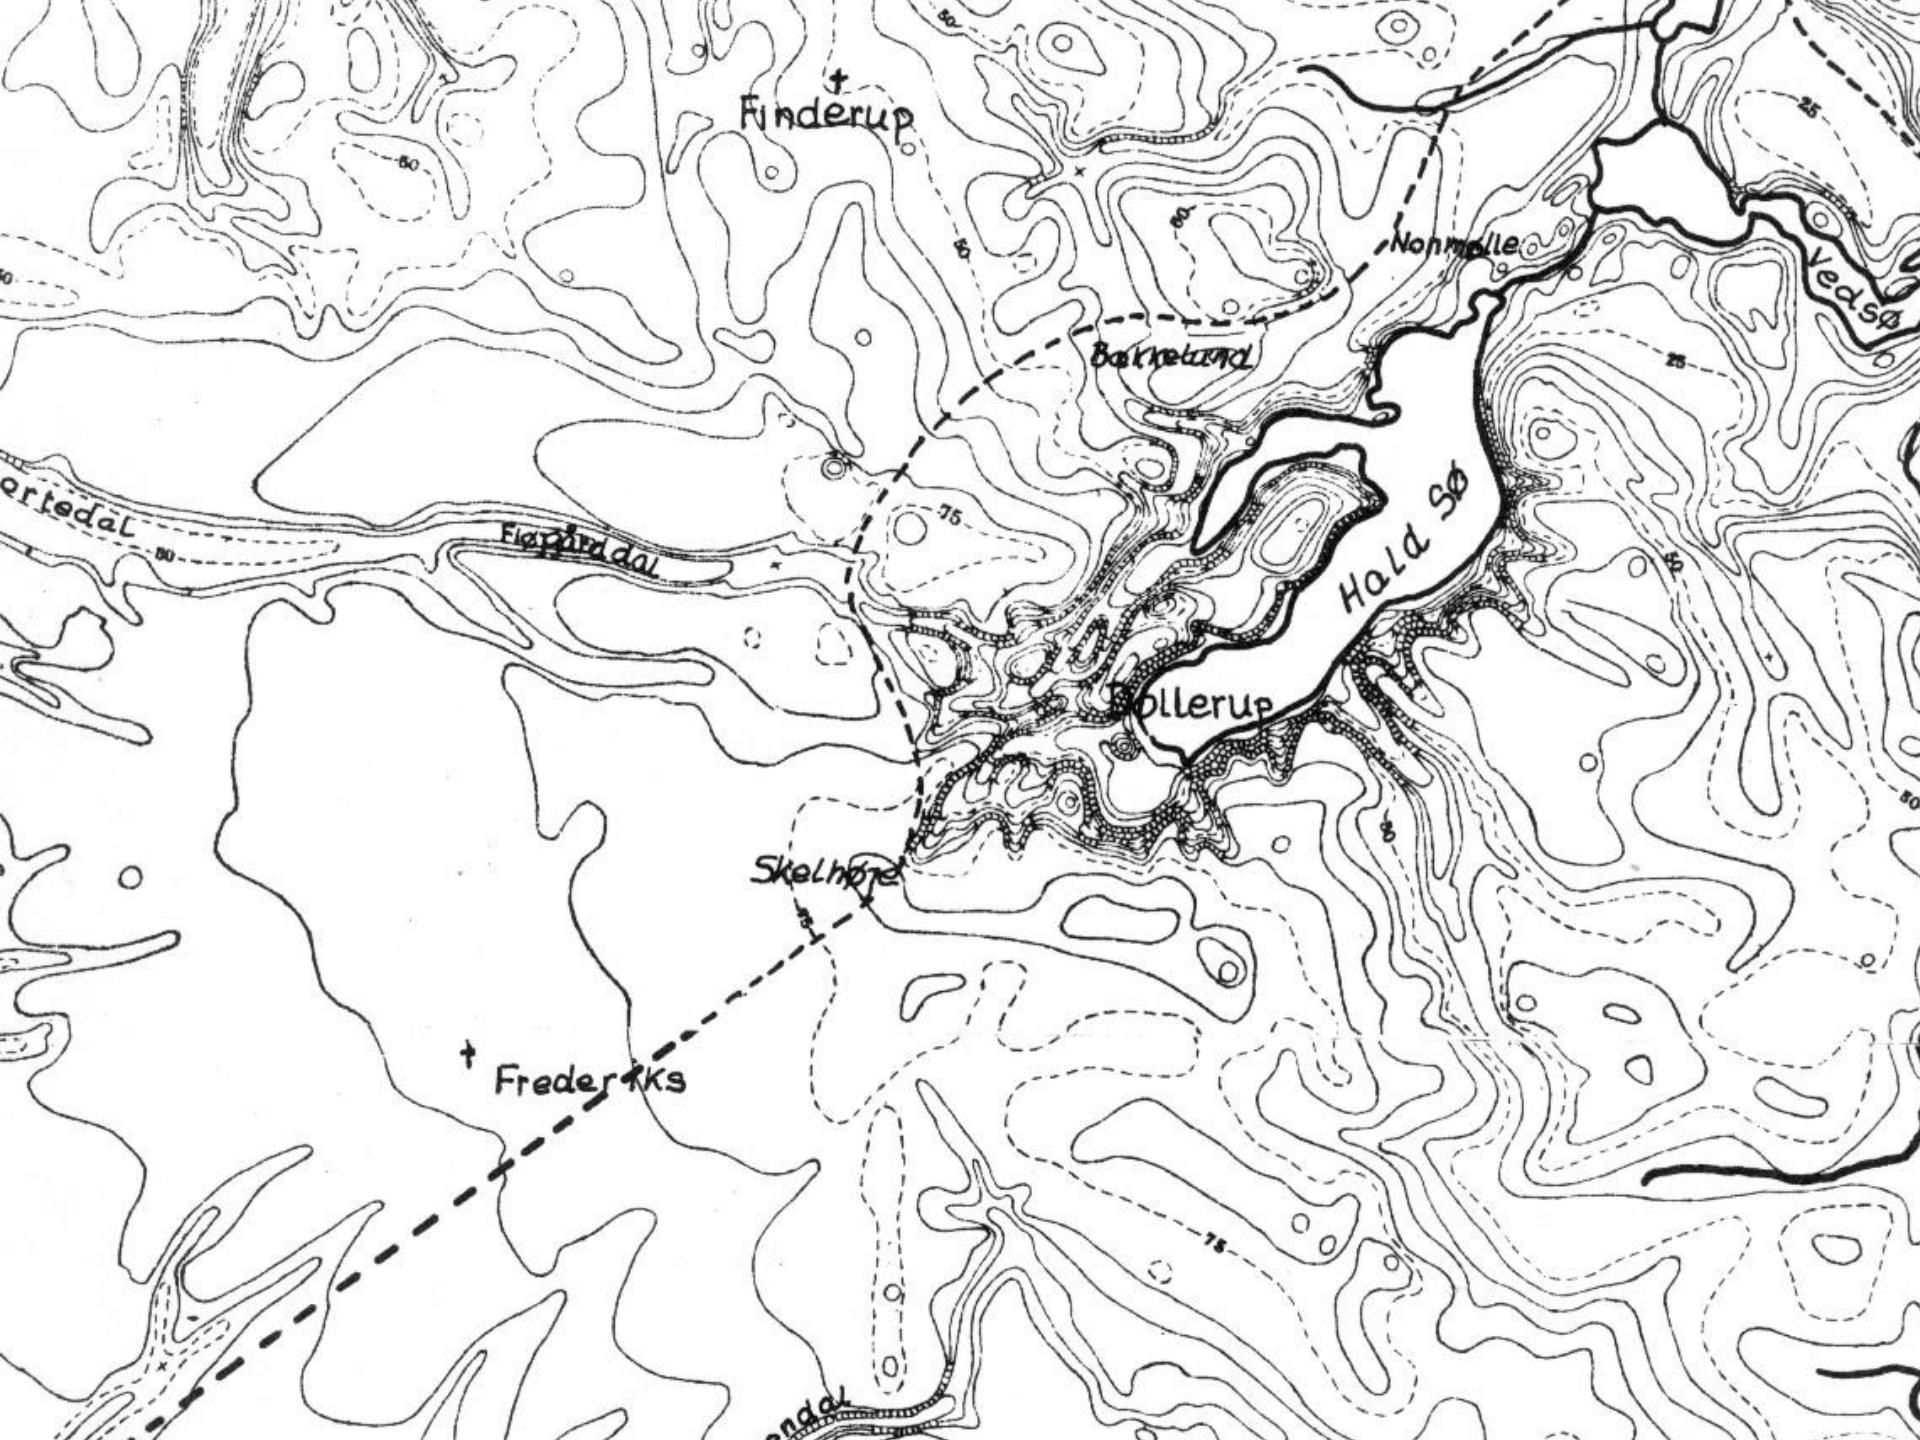

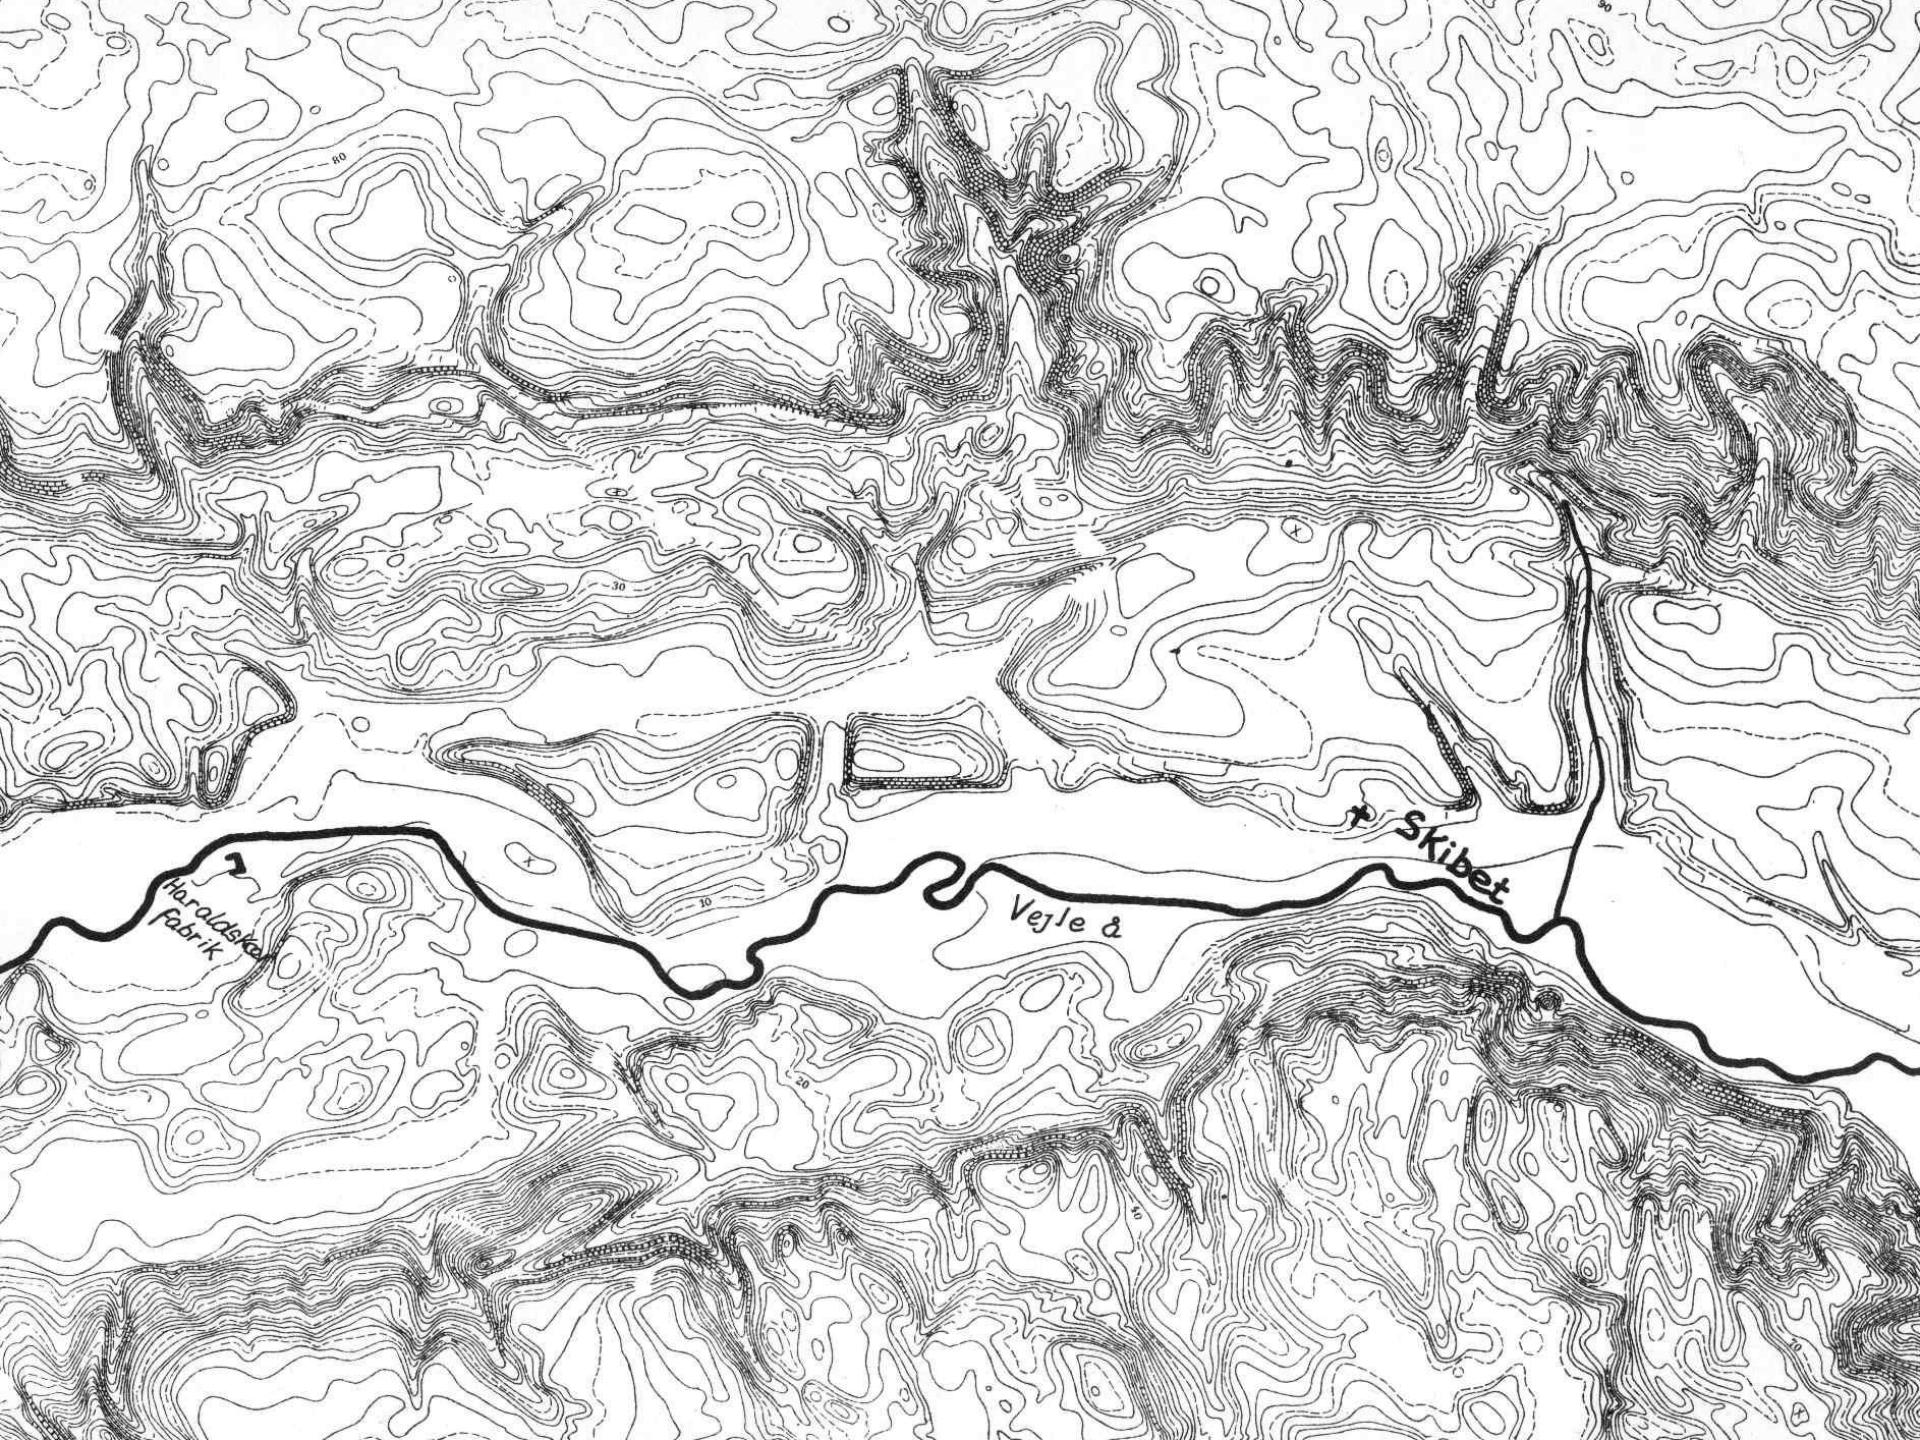

Fig. 2. DENNS AFSMELTNING FRA DANMARK I
SISTE ISTID.
Hovedopholdslinien
Større randbakkener
Israndslinier
Hypotetiske forbindelser
Småvandsfælde (I Vendesystemet: ihvevet)
Nogle områder med tydelige flote-retninger

Vise af bakketrængne er ikke randomiseret i egentlig forstand, idet der har ligget store dækkende
forsvand over dem under den seneste istid. (Bemærk se s. 40).
