Summing up Quiz: Preparing for the exam.

Work in "new" groups (ca. 35 min.) with the following issues. Remember to take notes; we'll discuss them in class afterwards.

1) Describe when you would choose to do qualitative research (compared to quantitative research).

2) Explain what is meant by the research paradigms:
   i) Positivist
   ii) Interpretive
   iii) Critical

3) We have encountered the following methodologies – what is meant by:
   i) Ethnography
   ii) Action research
   iii) Case study
   iv) Grounded theory
   v) Participatory design
   vi) Research through design
   vii) What are common traits among the methodologies? How and in what way do they differ?

4) Explain what is descriptive and constructive research? How do they apply to the methodologies mentioned above?

5) Explain what is meant by the researcher's positionality and reflexivity.

6)
b) Describe the qualitative data collection methods we have been learning about during this course.
a) Choose one of the methods and describe its strengths and weaknesses

7) Which issues do you have to take into account when conducting a study that comprises personal data?

8) Describe another topic, not covered above, that you have learned about in IN 5000/9000.

Good luck!

Guri, Fabiano and Vetle
