sigurro-in5480-2.pdf

Feedback to individual assignment for IN5480 second iteration to Sigurd Rognhagen from Paul Gude Deberitz - paaldeb

2 stars and a wish

- ❖ The structure and formatting of the delivery is pleasing, and the document is well referenced.

- ❖ I found the selection of Machine Learning definitions interesting, and the discussion of the relation to our treatment of the subject in IN5480 to the point.

- ✓ It is always difficult to find the balance beetwen overexplaining and undercommunicating, but as a general rule I would reccomend spelling out a term the first time it is used to explain an acronym.
