

## Module 3 – group task – evaluation Deadline: 7<sup>th</sup> of November 2019

Each group is to evaluate one widely used system of their choice (Netflix recommendation engine, google maps instruction, ruter...) or the system you have been working on during the first two modules.

Process:

- Decide the subject and the scope of the evaluation. What are you going to evaluate? Why have you selected this system?
- Make a plan for evaluating the system using the guidelines for Human-AI Interaction. How are you going to evaluate the system?
- Evaluate the system over a 3-4 days
- Describe what have you found

Deliverable:

- Describe briefly the evaluation plan, the evaluation results and lessons learnt from using the guidelines. This should be included as include as Appendix 3 in the final report

Expected workload:

- 4-8 hours work for each group member

In case of problems, email Amela ([amela@sintef.no](mailto:amela@sintef.no)).
