

# Interacting with Artificial Intelligence

University of Oslo, 2020

Hva skal du gjøre i helgen

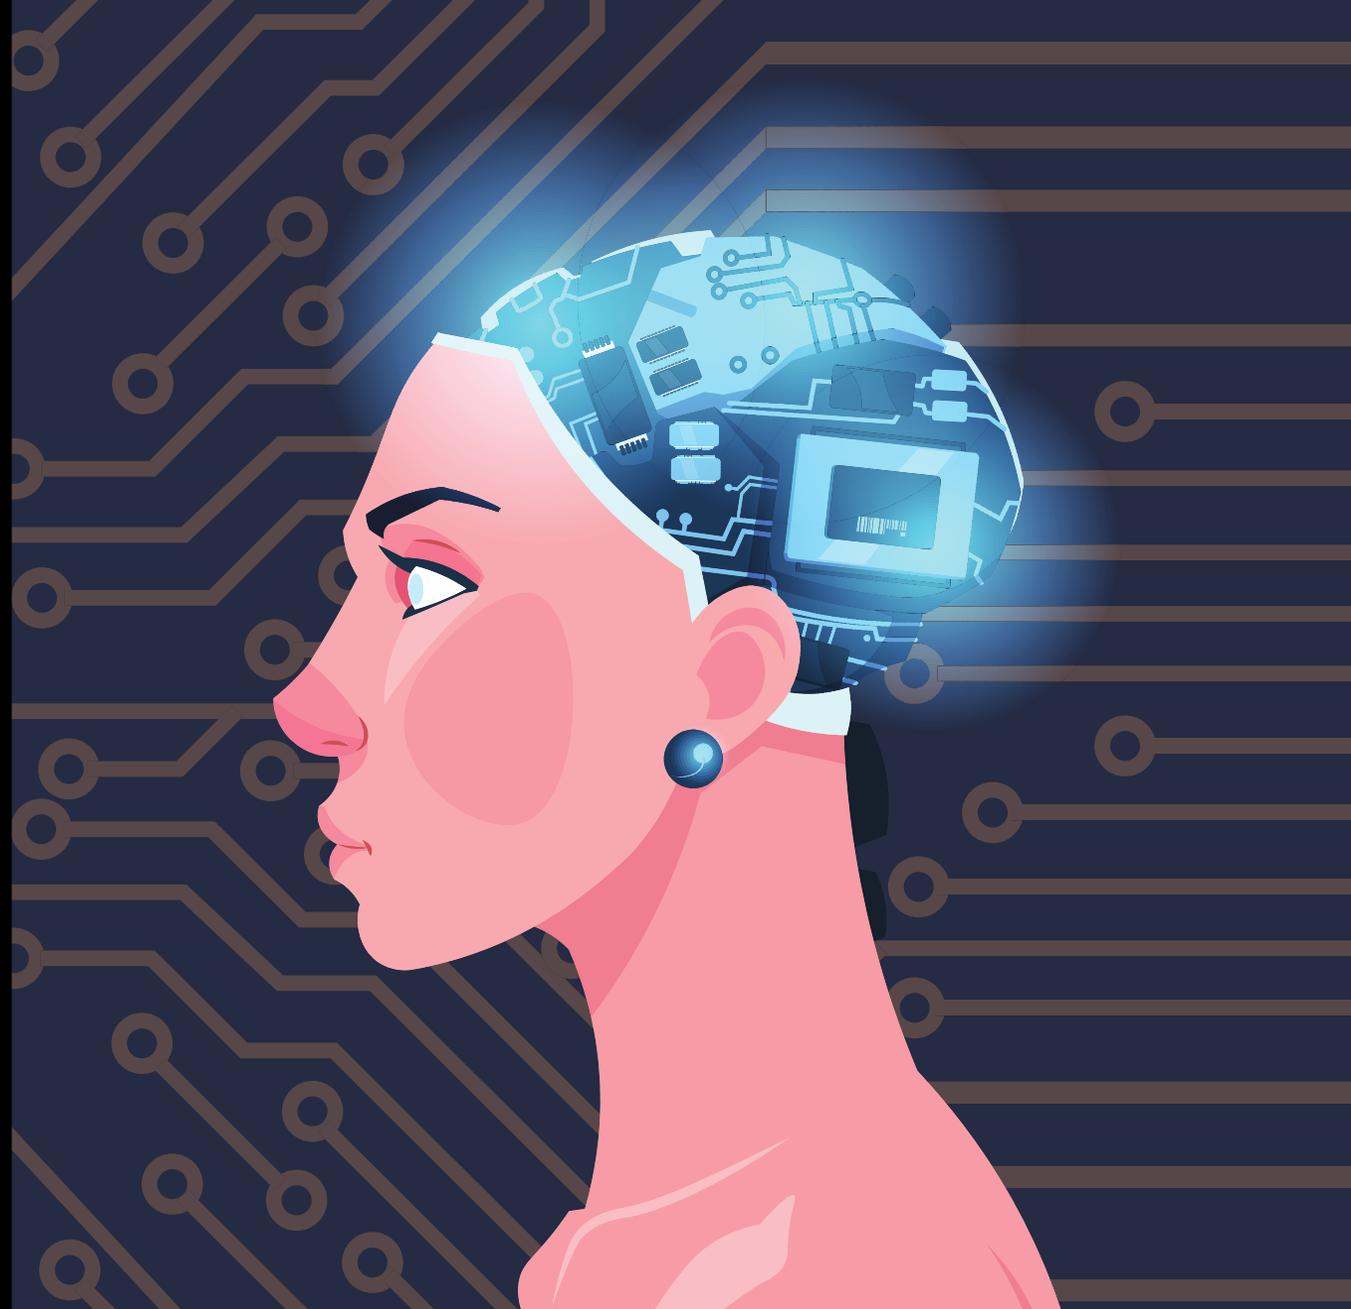

# Agenda

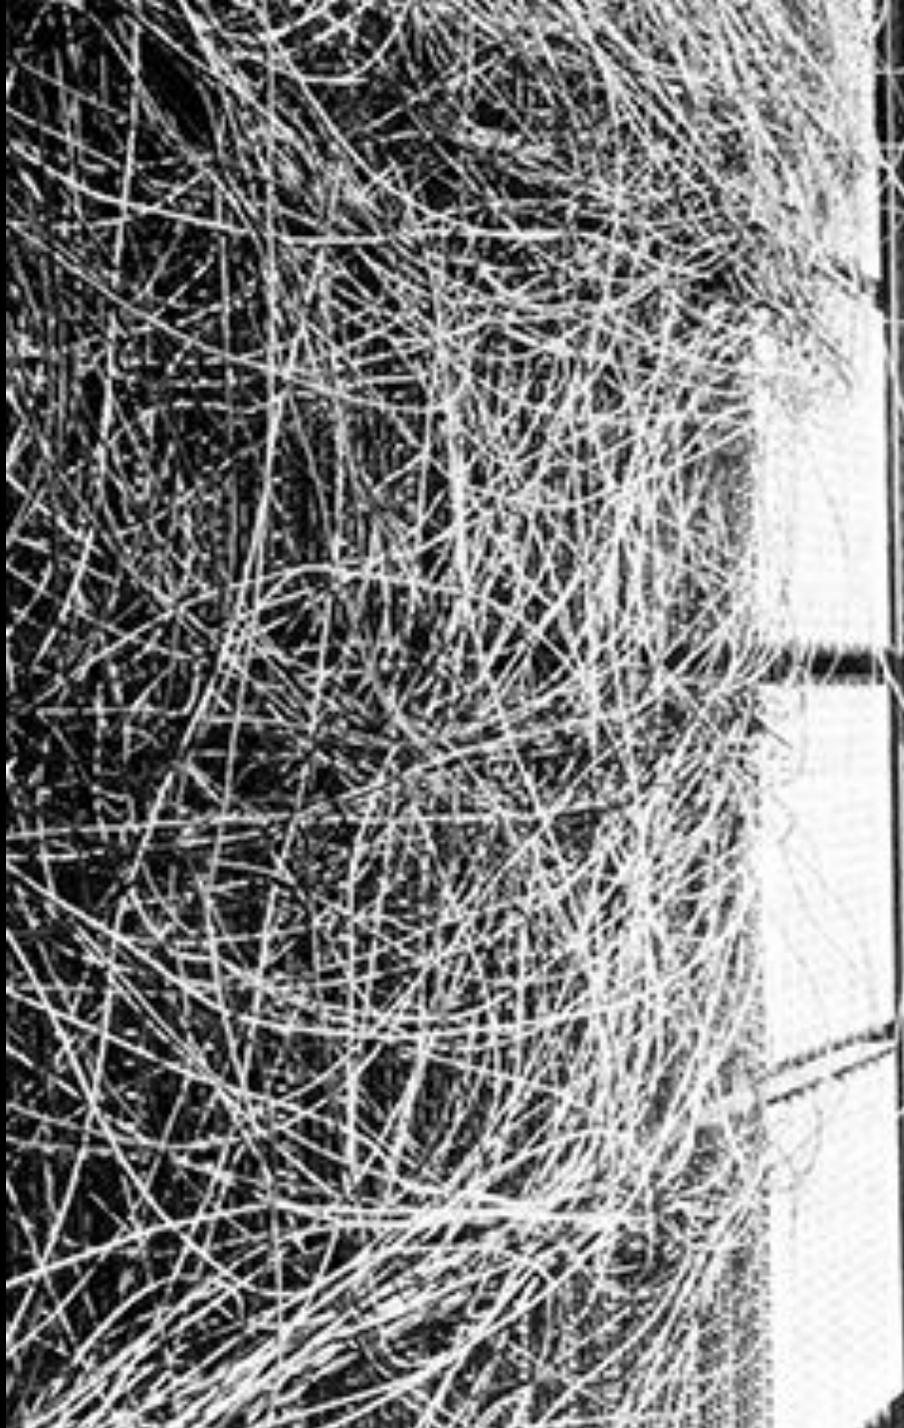

## Day 1:

1. Introduction to Artificial Deep Neural Networks
2. Create a classifier
3. Create a AI-based chatbot

## Day 2

1. Present your chatbot
2. Create a generative chatbot

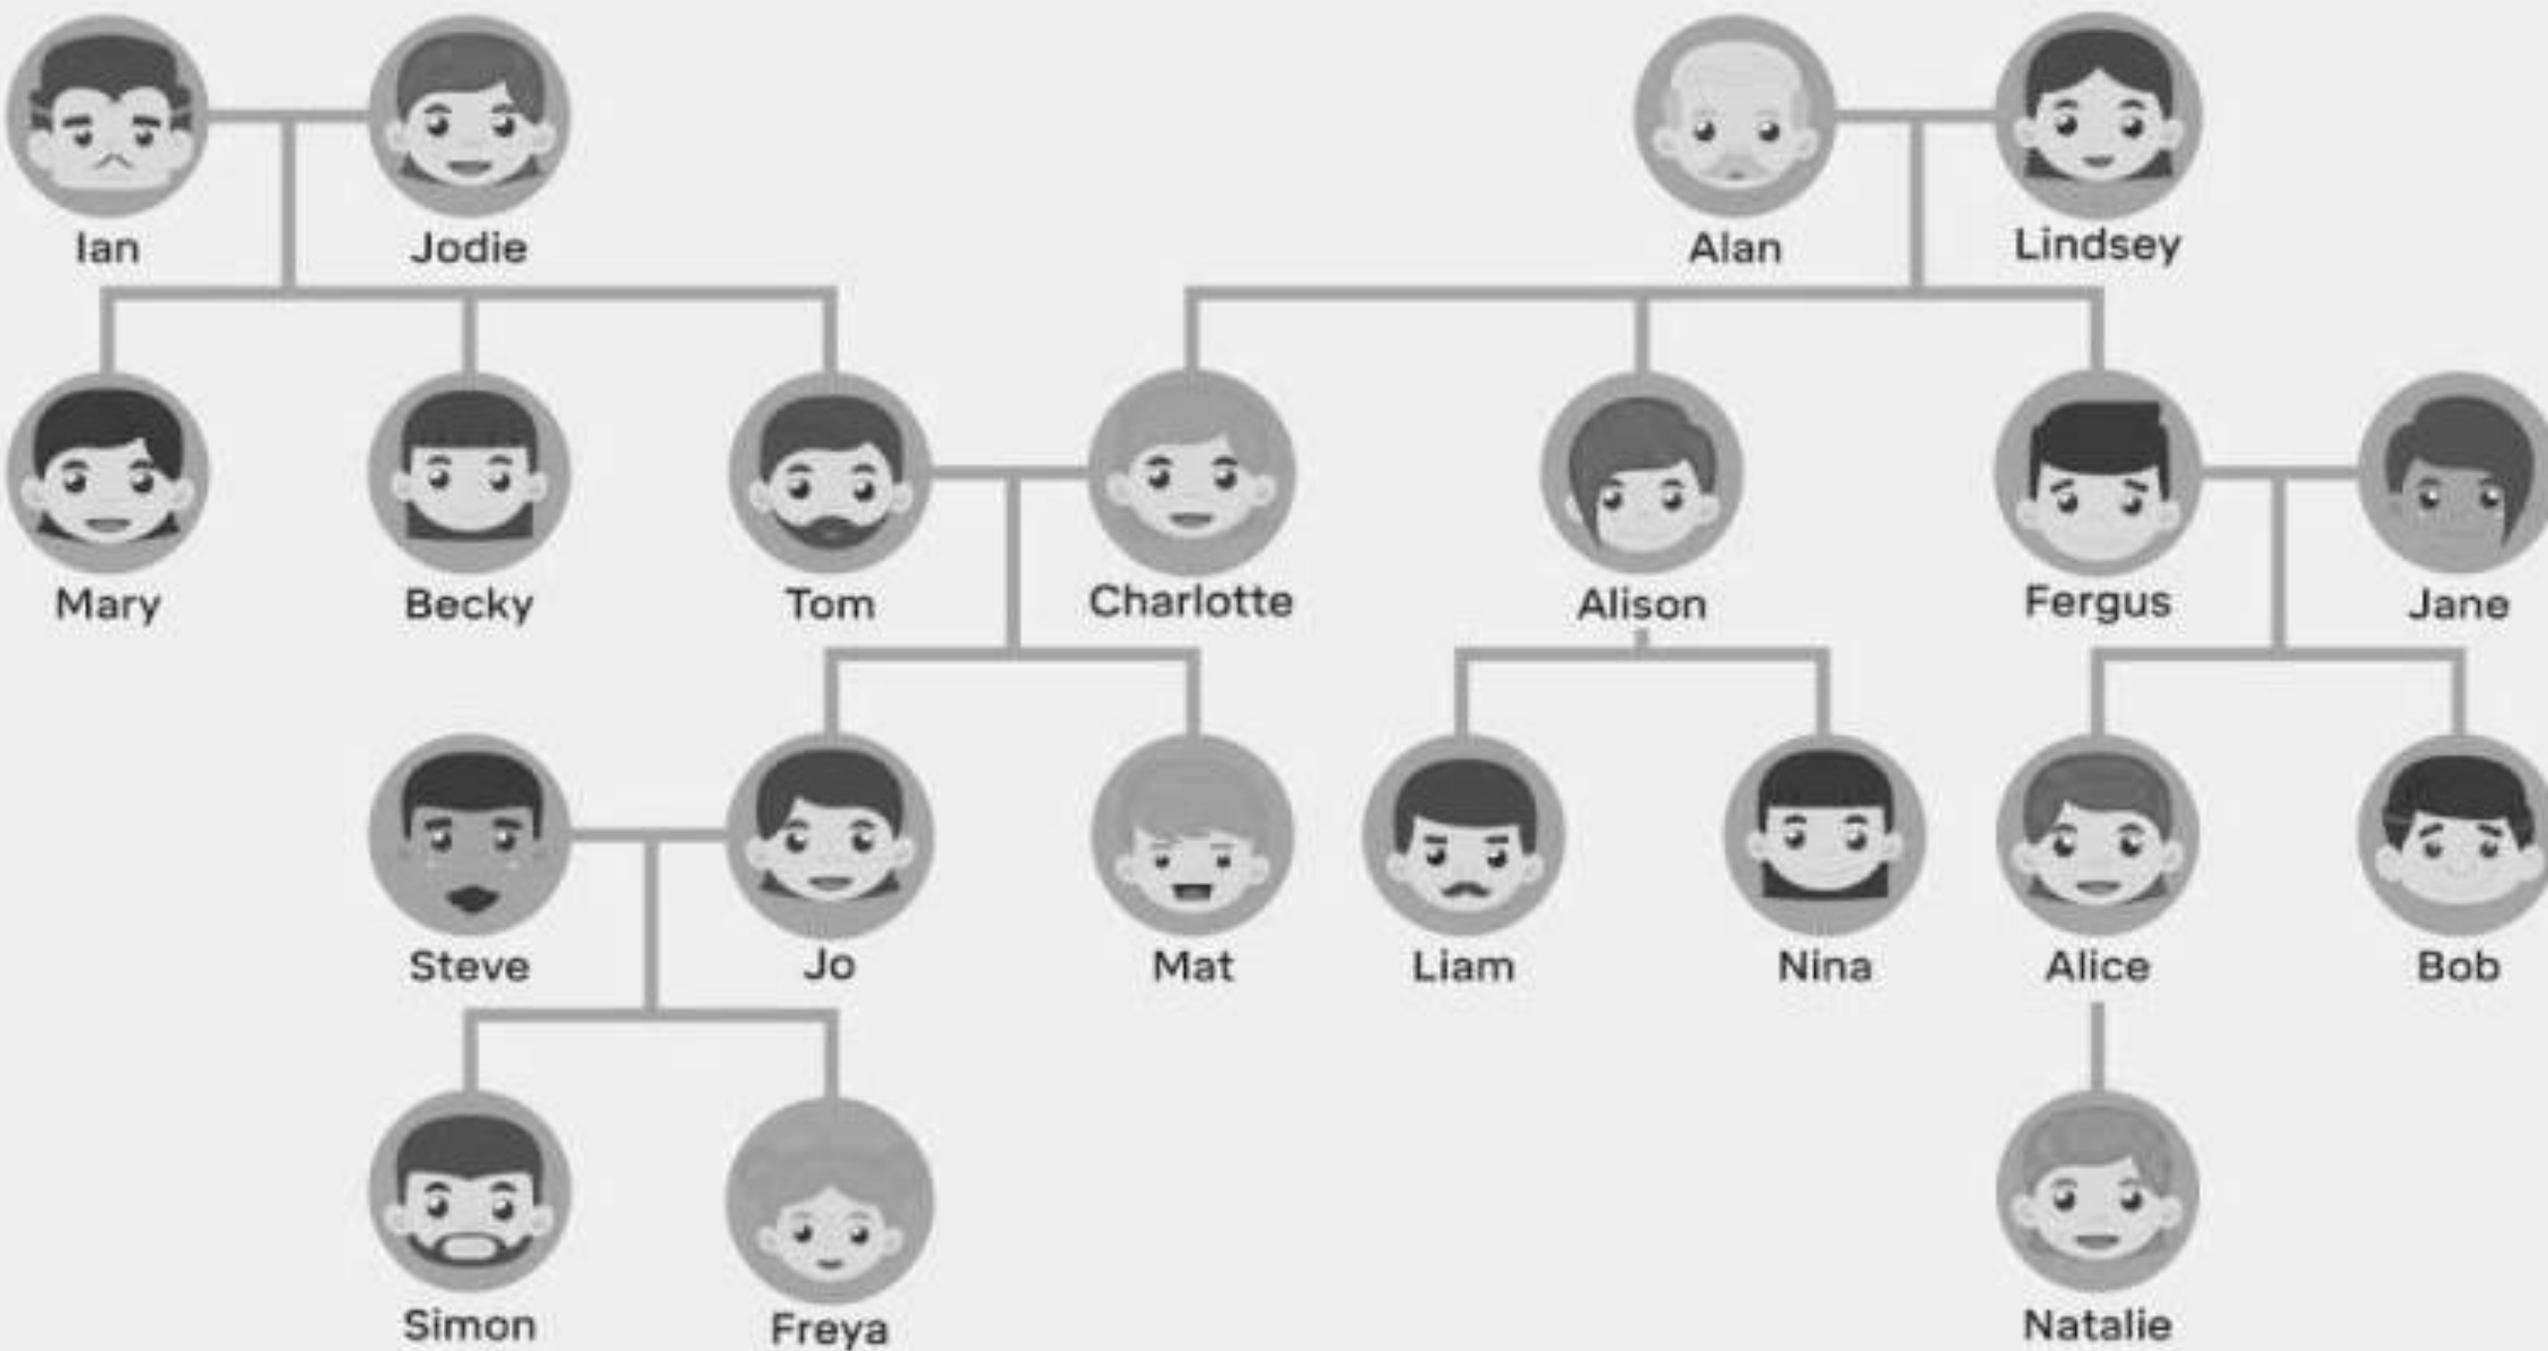

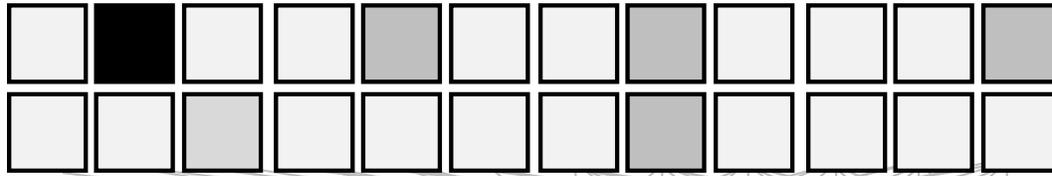

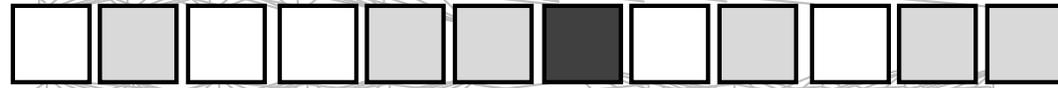

Gruppe med nevroner som representerer slektning

Skjult gruppe med nevroner 3

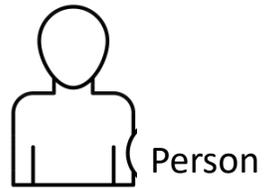

Skjult gruppe med nevroner 2

Skjult gruppe med nevroner 1

Gruppe med nevroner som representerer person og familieforhold

I am not really confident, but I think it's a man sitting next to a table holding a newspaper and he seems happy.

Microsoft Caption Bot

I am not really confident, but I think it's a man taking a selfie in a dark room and he seems very happy.

**Naïve ways of doing text classification?**

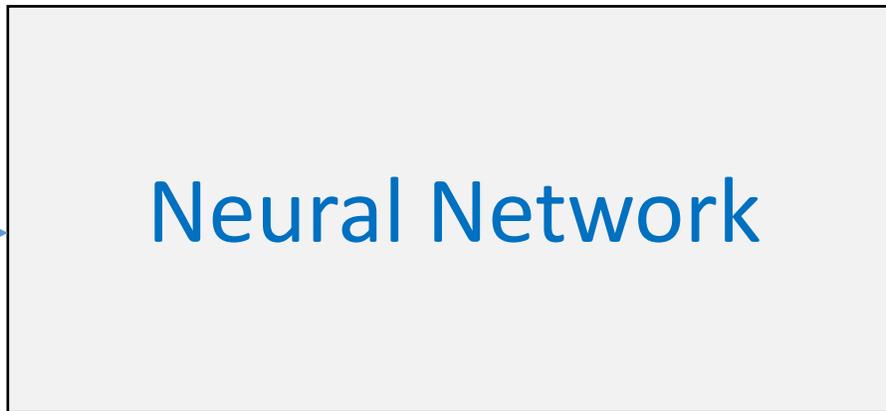

I like pizza  
and tacos

Food

I drive a  
big truck

Cars

Pizza 1

Taco 2

Sushi 3

Pizza

$[1 \ 0 \ 0]^T$

Taco

$[0 \ 1 \ 0]^T$

Sushi

$[0 \ 0 \ 1]^T$

I want to order pizza and sushi

[101]

Any challenges with this method?

I want to order pizza and sushi

[1 0 1]

I want to order pizza, because I  
hate sushi. Raw fish is disgusting

[1 0 1]

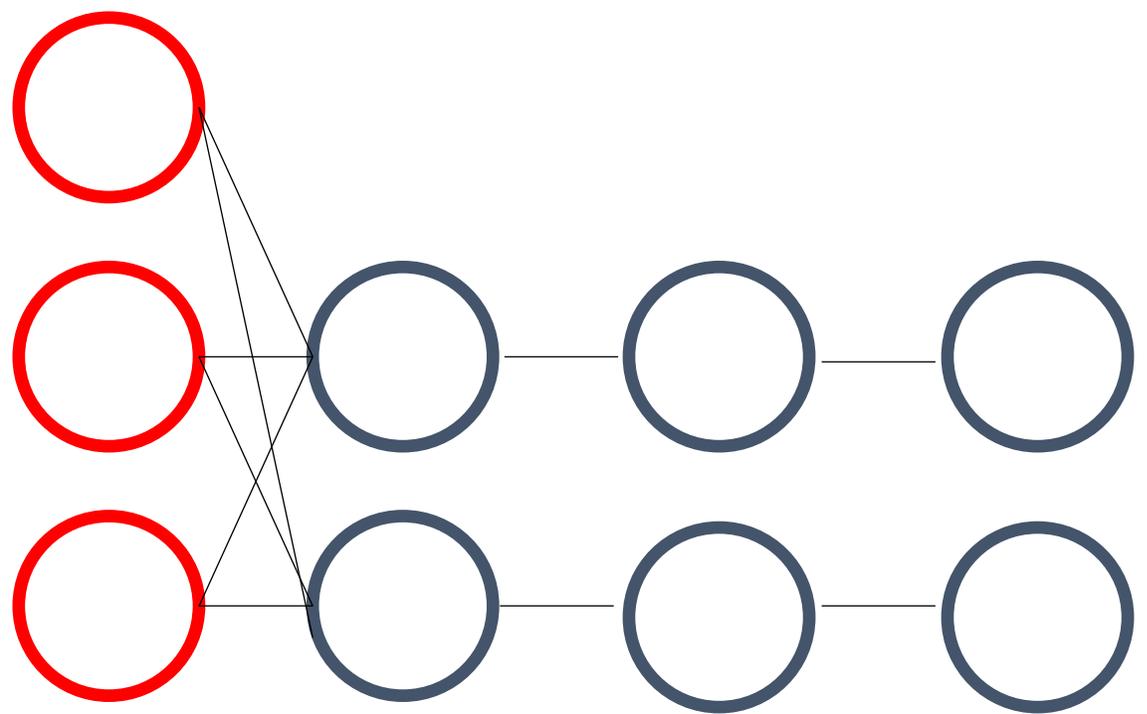

- LONG TEXT pizza
- [1 0 0]
- Short text pizza
- [1 0 0]

Make embedding for the vocabulary car, bike, truck

- Car: [1,0,0]
- Bike: [0,1,0]
- Truck: [0,0,1]

- Code: SimpleExample.py (start)

Input

Dense

Relu

Softmax

②

Embeddings

Pizza [1, 0, 0]

Taco [0, 1, 0]

Sushi [0, 0, 1]

Classes

Food [1, 0]

Cars [0, 1]

Input sentence I like pizza

Input vector  $[1, 0, 0]$

First Layer: Dense 3

Weights:  $[-0.5, -0.5, -0.5, 0, 0, 0, 1, 1, 1]$

First:  $1 \cdot -0.5, 1 \cdot 0, 1 \cdot 1 = [-0.5, 0, 1]$

Second  $[0, 0, 0]$

Third  $[0, 0, 0]$

Output  $\begin{bmatrix} -0.5 & 0 & 1 \\ 0 & 0 & 0 \\ 0 & 0 & 0 \end{bmatrix}$

## Second Layer ReLU

(3)

Input

$$\begin{bmatrix} -0.5 & 0 & 1 \\ 0 & 0 & 0 \\ 0 & 0 & 0 \end{bmatrix}$$

$$f(x) = \begin{cases} x & \text{if } x > 0 \\ 0 & \text{otherwise} \end{cases}$$

Output

$$\begin{bmatrix} 0 & 0 & 1 \\ 0 & 0 & 0 \\ 0 & 0 & 0 \end{bmatrix}$$

Third layer Denc

(4)

Weights:  $[0.5, 10]$

input  $\begin{bmatrix} 0 & 0 & 1 \\ 0 & 0 & 0 \\ 0 & 0 & 0 \end{bmatrix}$

$$\begin{bmatrix} 0 + 0 + 10 \\ 0 + 0 + 0 \\ 0 + 0 + 0 \end{bmatrix} \Rightarrow \begin{bmatrix} 10 \\ 0 \\ 0 \end{bmatrix}$$

Front Layer  
Flatten

input [10, 0, 0]

output [10, 0]

Fifth Layer Softmax

Input  $[10, 0]$

$$1: 10 / (10+0) = 1$$

$$2: 0 / (10+0) = 0$$

output  $[1, 0]$

Class

Food  $[1, 0]$

Car  $[0, 1]$

100% Food

## Abstract

Although much effort has recently been devoted to training high-quality sentence embeddings, we still have a poor understanding of what they are capturing. “Downstream” tasks, often based on sen-

hard to tell *how* the system (or even a human) comes to this conclusion. Complex tasks can also carry hidden biases that models might lock onto (Jabri et al., 2016). For example, Lai and Hockenmaier (2014) show that the simple heuristic of checking for explicit negation words leads to good accuracy in the SICK sentence entailment task.

*A train carriage containing controlled nuclear materials was stolen in Cincinnati today. Its whereabouts are unknown.*

The incident occurred on the downtown train line, which runs from Covington and Ashland stations.

In an email to Ohio news outlets, the U.S. Department of Energy said it is working with the Federal Railroad Administration to find the thief.

“The theft of this nuclear material will have significant negative consequences on public and environmental health, our workforce and the economy of our nation,” said Tom Hicks, the U.S. Energy Secretary, in a statement. “Our top priority is to secure the theft and ensure it doesn’t happen again.”

The stolen material was taken from the University of Cincinnati’s Research Triangle Park nuclear research site, according to a news release from Department officials.

The Nuclear Regulatory Commission did not immediately release any information.

According to the release, the U.S. Department of Energy’s Office of Nuclear Material Safety and Security is leading that team’s investigation.

“The safety of people, the environment and the nation’s nuclear stockpile is our highest priority,” Hicks said. “We will get to the bottom of this and make no excuses.

SEP

Raushet handler om at jeg har en tro, og tenne lys. Jeg har stillet i et hellig rom.

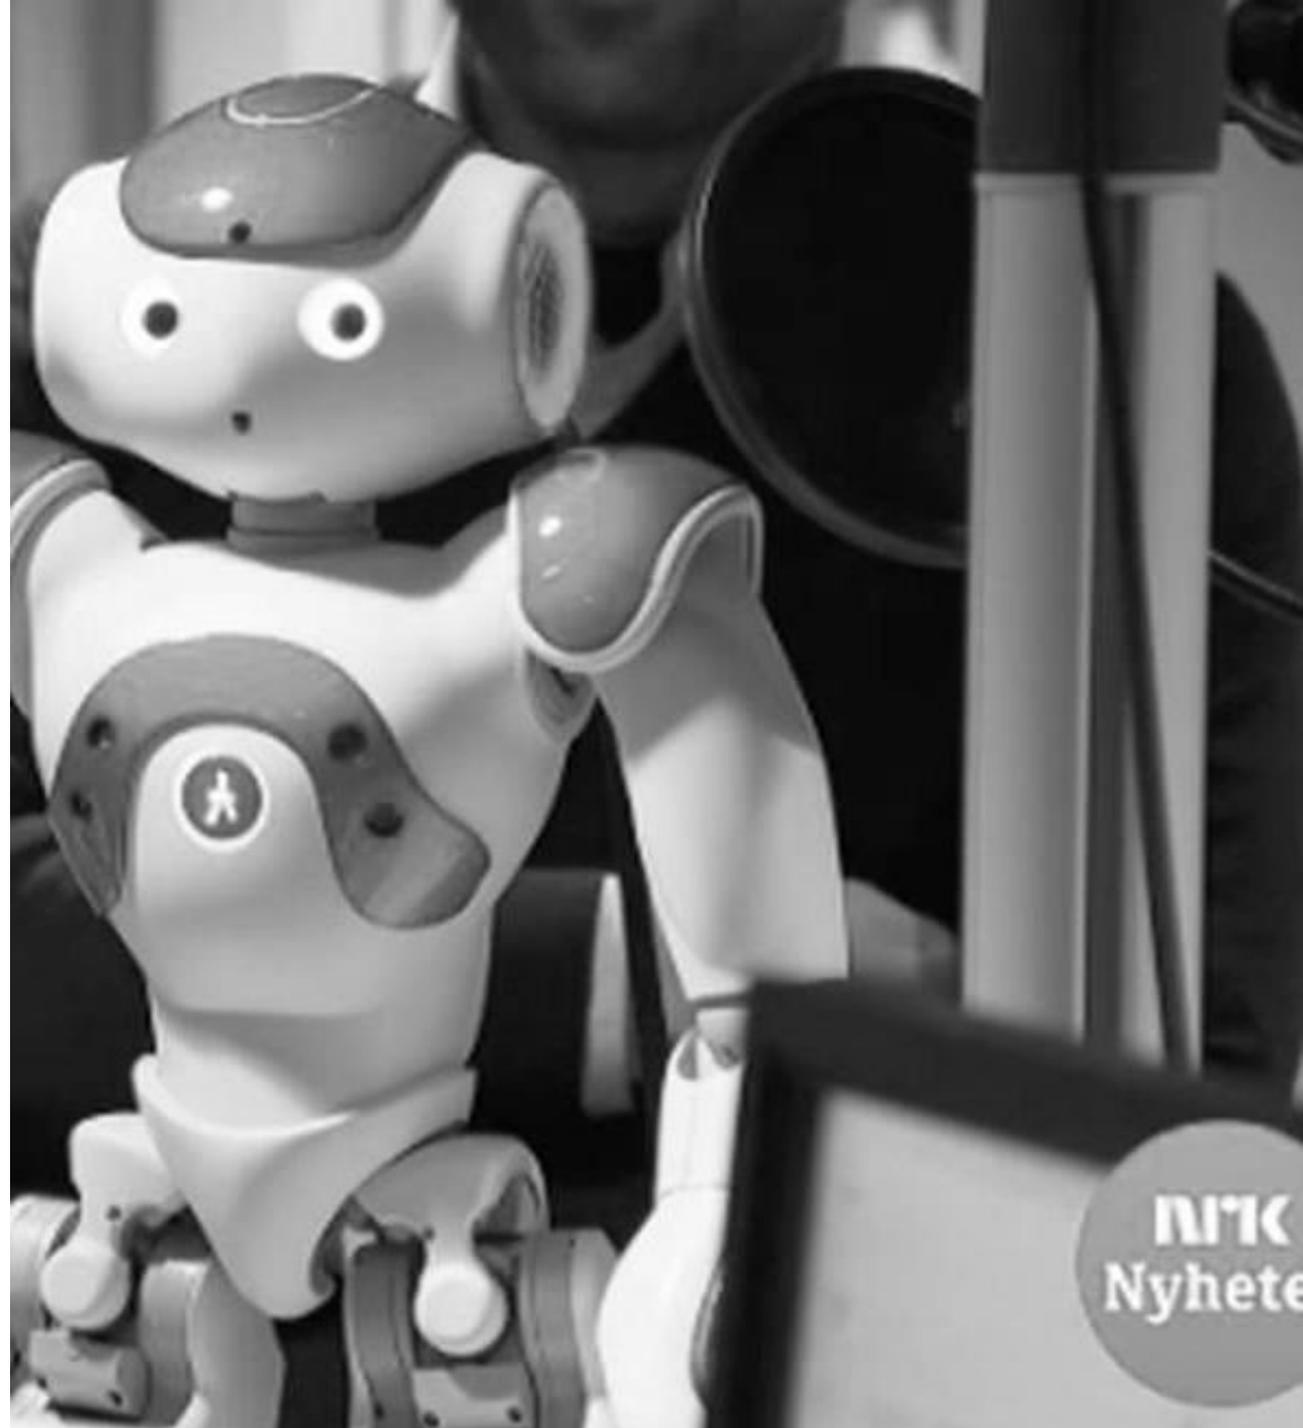

Mitt hjerte vanker i forventning. Og hjertet skal være glede.

Og Jesus, Jesus. Ved bordet sitter englene fra din tid og sier dette:

”Han fant de fattige og uvetlige for å være nær.”

Gud ble tent av sin sorg og ventet.

Du er verd å elske.
