Brainstorm the project plan

Seminars – Bachelor VS master

Walkthrough of the project description

Introduction to project planning

Work on the project plan in your groups

Seminars – Bachelor VS master

- There will be no repetition of the curriculum

- I will not tell you how to use the articles in your project report

- We expect independent work

The project description

Purpose

- Make a **description** of an **application area** using the methods and techniques

- Design a prototype of a service/system

- Analyse the design process and the design

The project work

- A project plan

- A midterm presentation

- A final presentation

- A project report (more on this another time)

Introduction to project planning

- A group assignment

- Talk together and think about what you can get done

- Identify e.g. obligations you have during this semester

- Impossible to make a detailed plan at this point, but use the time to reflect together as a group

- There is no right or wrong way to do this assignment

- You can find it on the bottom of the project description

Introduction to project planning

The plan must contain

- A short description of the area and theme

- What you aim to find your or address with the design (the purpose

- A description of the target group

- What methods and techniques you believe you will use

- A tentative plan for the project
