### **5.1** Sets

#### 5.1.1 Exercise

What is the difference between  $\emptyset$  and  $\{\emptyset\}$ ?

#### 5.1.2 Exercise

In this exercise we will use the following sets:

- $A = \{a, b, c, d\}$
- $B = \{d, f, e, r, k\}$
- $C = \{r, e, m\}$
- $D = \{q, l\}$
- $E = \{\}$
- $\Delta$  is the universal set.

What is the cardinality of each of these sets?

List all the elements in the following sets:

- 1.  $A \cup B$ .
- 2.  $A \cup (B \cap C)$ .
- 3.  $(A \cap B) \cup (C \cap A)$ .
- 4. B C.
- 5. C B.
- 6.  $D \cap -E$ .
- 7.  $D \cup -E$ .

#### 5.1.3 Exercise

Let F and G be two arbitrary sets and  $\Delta$  the universal set. Draw Venn diagrams containing the sets F, G and  $\Delta$  and shade the area representing the following sets:

- 1. -F.
- 2. -G.
- 3.  $-(F \cup G)$ .
- **4.**  $-F \cap -G$ .
- 5.  $-(F \cap G)$ .
- 6.  $-F \cup -G$ .

#### 5.1.4 Exercise

Create three sets A, B and C such that the following hold:

- The union of A and B is  $\{1, 2, 3, 4\}$ .
- The intersection of A and C is  $\{3\}$ .
- The union of B and C is  $\{3, 4, 5, 6\}$ .
- The intersection of B and C is  $\{4\}$ .

### 5.1.5 Exercise

Let  $A = \{1, 2, \{1, 2\}, \{1, 3\}, \{1, 2, 3\}\}$  and decide if the following hold

- $1 \in A$
- $2 \in A$
- 3 ∈ A
- $\emptyset \in A$
- $\{1\} \in A$
- $\{1,3\} \in A$
- $\{1, 2, \{1, 2\}\} \in A$
- $\emptyset \subseteq A$
- $\{1\} \subseteq A$
- $\{1,3\} \subseteq A$
- $\{1, 2, \{1, 2\}\} \subseteq A$
- $\{\{1,2,3\}\}\in A$

#### 5.2 Relations

#### 5.2.1 Exercise

Let A be the set  $A = \{a, b, c, d, e, f\}$ . Create non-empty relations  $R_i$  on A such that the conditions below hold.

- 1.  $R_1 = A \times A$
- 2.  $R_2$  is reflexive.
- 3.  $R_3$  is symmetric.
- 4.  $R_4$  is transitive.
- 5.  $R_5$  is irreflexive.

#### 5.2.2 Exercise

Assume the normal intended interpretation. Which of the following relations are reflexive, transitive and/or symmetric?

- hasSister
- hasSibling
- hasFather
- hasParent
- hasAge
- hasSpouse
- likes

## 5.3 Propositional logic

#### 5.3.1 Exercise

Let  $\phi$  be the propositional formula  $(P \land Q) \lor R \to S \land Q$ .

- Create an interpretation  $\mathcal{I}_1$  such that  $\mathcal{I}_1 \models \phi$ .
- Create an interpretation  $\mathcal{I}_2$  such that  $\mathcal{I}_2 \not\models \phi$ .

#### 5.3.2 Exercise

- Find the truth table to the formula  $(P \to Q) \to P$
- Find the truth table to the formula  $(P \to Q) \lor (Q \to P)$
- What is there to note about the two formulae?

#### 5.3.3 Exercise

Decide the following entailment questions. If the answer is yes, then produce a proof, e.g., a truth table, which shows why the answer is yes. If the answer is no, then produce a countermodel, i.e., an interpretation which makes the first formula true and the second false.

- Does  $P \vee Q$  entail Q?
- Does  $P \wedge Q$  entail  $P \vee Q$ ?
- Does  $P \to (P \to Q)$  entail Q?
- Does  $P \wedge \neg P$  entail Q?
