

Improvement process: Change deployment process

06.10.2011 – Thomas Olavsson Hilde

thomaoh@ifi.uio.no

1. Context of your improvement project

- Improvement project: Change deployment routines of services to a cluster of servers
- Use my company (DnBNOR IT) as PILOT/testing on this process improvement

2. Issues that trigger your improvement project

- Manual coordinating
 - Too much time
- Manual deployment processes (“human hands deployment”)
 - Too much time
 - Triggers a lots of errors
- NO version control

3. Goals you want to achieve with your improvement project

- Automate deployment process
 - Less time
 - Less errors
- Schedule tasks to trigger deployment (daily, weekly etc.)
- Install packages (.msi)
- Version control!

Today/future?
