What is a netbook?

- Mobility and usability
- Availability and affordability
- Ability to run custom software

- Are netbooks really mobile devices?
- Cellphone as hand held interface
- Android

- Architecture
- Practices
- Institution

Example software

- Psiloc Wireless Presenter
- Mobiola Headset for Skype
- pyacceleremoter
- mobile as wlan server software (what was the name)?
- anyremote
- blueproximity
- salling clicker
- mobiola headset for skype
- bluetooth remote

- Study of users
- WLAN and positioning

- Google docs - works well for collaboration
- Google groups - works well for communication, would like to see integration with docs
- Videoconferencing - we would like to try it to make it easier to meet
- Google scholar - very good for finding papers, exporting references.
- Zotero - good option instead of bookmarking, work in progress.
- Mindmaptools - great for brainstorming sessions and document overviews, brainstorm presentations
- latex, bibtex and reftex
