

Lab session optional tasks – Week 40 – INF5750

1. Get familiar with DHIS2 by using the live demo at www.hisp.info:8090. Note that DHIS 2 only support W3 compliant browsers like Firefox and Opera, which can be found under *unsupported software* at the IFI computers. You may log in with username *admin* and password *district*.

Set up the following meta-data:

- User
- Organisation unit
- Data elements
- Data set

Then start entering some test data for your newly created data set and organisation unit in data entry.

2. Check out the DHIS 2 source code and import into Eclipse. All students have been granted access to the repository at the following URL:

```
svn+ssh://<username>@login.hisp.info/home/projects/dhis/scm/trunk/dhis-2
```

Execute the following command from the *root folder*:

```
mvn eclipse:eclipse install
```

Navigate to the *dhis-web* folder and execute the following command:

```
mvn eclipse:eclipse
```

Then import all projects into Eclipse.

3. Look through group assignments at the following URL:

```
http://www.hisp.info:8080/display/RandD/INF5750+admin
```

Send an email to olati and larshelg AT ifi.uio.no with the following information before Wednesday October 3.:

- 1st, 2nd, and 3rd priorities on projects you would like to work on.
- The lab sessions you are able to join (same hours as before, but not all can expect to get the same day).
- A justification of why you should be assigned to your prioritised projects - linked to your skills, background, and interests.
