TOOL 5100, Lecture 4, Questions, Sept. 17th, 2009

1. What is instructional scaffolding and how it is related to ZPD?
2. What is computer-aided critiquing and how is it related to instructional scaffolding?

Note: In these and the other questions there are no "one right answer," but multiple alternative (good enough) answers/positions. You need to provide arguments to support your position, drawing on examples (e.g. systems), related literature in the course and elsewhere, or empirical data.
