

TOOL 5100, Lecture 4, Questions, Sept. 24th, 2009

1. What is a design experiment, according to Krangle and Ludvigsen (2009)? Explain how the design experiment reported in the paper is set up.
2. Mention some of the findings reported in their design experiment. What are some implications for design based on these findings, according to the authors?
3. Explain how Krangle and Ludvigsen see the relation between institutional aspects and knowledge construction (both in productive and non-productive ways)
4. What is interaction analysis and what data does an interaction analysis give us?
