

TOOL 5100, Lecture 6, Assignment 4, Oct. 8th, 2009

1. What are the theoretical perspectives that provide the foundations for the three kinds of instructional technologies that Koschmann discusses in his article? Pick one of them and argue for its relevance
2. What are the implications of these perspectives for a) computer support and b) for analysis of data
3. Do you agree or disagree with the statement in page 13 in Koschmann's article: "Although they arise within different disciplines and utilize different metaphors of social process they all represent a gestalt-like shift in point of reference relative to the views taken by the paradigms described previously"
