

These PDF's are my handwritten notes for the exercise sessions in Topology (MAT3500/MAT4500) during the autumn semester of 2016. Thanks to Glen Wilson and Håkon Kolderup for giving a lecture each (their notes are the legible ones). Please use the notes with care. The solutions are often only proof sketches, uses nonstandard notation or might contain errors (corrected during the lecture of course).

Found an error or have a question? Please send me an email: jonasik@math.uio.no.
