

Unifai's mission is to build world-class products that enable and propel industrial AI to new heights.

We founded Unifai in early 2020 to empower data scientists and engineers, and radically expedite the process of converting raw data into useful insight. We are currently serving our first customers in Norway and the USA and experiencing exciting traction in the industrial space. We are now looking for talented team members to join us in fuelling industrial AI.

The team.

Alexandra Gunderson

Co-founder

Previously Chief Data Scientist at Atea

Łukasz Mentel

Co-founder

Previously Head of Data Science at Arundo Analytics

Hassan Goma

Co-founder

Previously Delivery Director at Arundo Analytics

The challenge.

Help us develop and implement **time series analytics** including semantic segmentation, classification, and similarity search for industrial sensor data.

We have data from **multiple equipment classes and industries** - including heat pumps and compressors - and concrete use cases for you to test your methods against.
