

## **How the exam is carried out**

There will be one home exam for each oblig pair which centers around the oblig topic for the pair. The home exam will be put out on the web early morning two days before the exam takes place. Students will give presentations **individually** (15-20 minutes) of their topic. There will be questions on other topics afterwards. No more than 45 minutes will be allocated to each student.

For their home exam presentations the students can choose between two possibilities. **Either** make a power point presentation (with two written copies handed in as the lecture starts) **or** submit a written report (still two copies) handed in at the start of the lecture which is then in a format of the student's own choosing.
