

Menti-links from the Seminar in Pediatric Cardiology

Dear students

Big thanks for your contribution! Also thanks for very positive feedback and suggestions from those who answered the evaluation immediately. I do listen to constructive criticism, so please let me know if you have suggestions or further comments by answering the evaluation.

Only those written in bold text below were used in the seminar. The codes are active until 25.04.23 but you don't get animations and/or sounds via Menti.

Please keep the tasks and links as secrets so I can re-use them! 😊

- **Evaluation** 1549 7998 <https://www.menti.com/ghumfxenw3>
- **Lecture-related questions** 1403 4048 <https://www.menti.com/j6rrjawndj>
- **Quiz** 34920320 <https://www.menti.com/tmgo3czk8g>
- Case "A heart on fire" 1128 2704 <https://www.menti.com/1k32jr9ix>
- **Case "It must be a camel"** 1630 2341 <https://www.menti.com/alpf5h9kf1tb>
- **Case "Running around in circles"** 4745 2923 <https://www.menti.com/gx1i5ab4kh>
- Case "Double up" 15 34 13 3 <https://www.menti.com/alcib1iodb8t>
- Case "Get up, stand up" 2375 6444 <https://www.menti.com/4uisqhibog>

You find the intended learning on next page!

(The names of the cases are songs/tunes, and by listening to the suggested artists' versions, you will encounter a broad range of sounds...)

Regards, Henrik

Learning from case «A heart on fire...»

- Management of an incidental finding
- Incidental findings are usually less urgent than presentation by symptoms
- Beware of the tracks you make by your advices!

Little Simz

Learning from the case «It must be a camel»

- Things are not always as they seem!
- This case includes acute symptoms of bronchiolitis (incl. desaturation) added to heart failure symptoms
- Heart failure symptoms are unspecific
- Co-morbidity may obscure clinical pictures
- Heart defects may present during infections

Frank Zappa

Learning from case «Running around in circles...» and «Double up»

- Reflection on different anatomies
- Neonatal pathophysiology; a duct-dependent pulmonary circulation in the first case
- The second case illustrates one of the few situations with combined heart failure and cyanosis
- Prediction of symptoms from a hemodynamic background

The Speroners
Lady XO

Learning from case «Get up, stand up...»

- Typical symptoms of reflex-syncope, a common functional disorder
- ECG showing respiratory sinus arrhythmia
- Avoidance of unnecessary examinations
- Red flags indicating increased risk

Bob Marley
