

## **Eksamensoppgaver TIK 4001 – Høsten 2013**

Besvar én av følgende oppgaver:

1. Analyse and discuss ways in which approaches from STS or Innovation studies, or both, contribute to our understanding of technological change.

2. Identify an innovation (historical or contemporary that you find in literature or media) and document the main characteristics and processes associated with its occurrence. Discuss and analyse the success (or failure) of the innovation by using literature, approaches and concepts introduced in Module 3.

3. Identify a controversy (historical or contemporary that you find in literature or media) that involves science and/or technology. Document its main characteristics and the processes associated with its occurrence. Discuss and analyse the roles of experts in relation to other group of actors and use the theoretical approaches introduced in Module 4.
