

Evaluation-form

Course-code: OADM 2100

Course title: Managing and leading public organizations

Language: Norwegian English

Course convener's evaluation of the course:

The course worked well given the transition semester. Attendance in the lecture room was varried and I think some students only followed the course using recordings. It was at times hard to enagege students in the lectures but using cases helped

Summary of feedback from student contact-point:

Overall the course worked well. Especially the use of cases was good. Cases could have been given more time and discussed more in groups in the lecture. More guidance on how to write papers in the seminars would have been good.

Suggestions for improvements:

Use the cases more actively (maybe also in seminars). Have small group discussions in the lecture as part of the case work to activate students. As the course has many exchange students, explain formalities of writing papers at UiO in first seminar.
