

Evaluation-form

Course-code: STV2420

Course title: Theorizing Public Organizations

Language: Norwegian English

Course convener's evaluation of the course:

By and large, the course worked well. Due to surprising illness of one of the lecturers another colleague had to fill in on short notice for two lectures. In addition, in-room participation declined significant during the semester. Some Inspera issues

Summary of feedback from student contact-point:

Overall course was very good. Course content is sometimes a bit difficult. More overview of the connections between texts esp for writing would be good. Earlier & more seminars to help "read" texts. Feedback on papers consecutively (Inspera problem)

Suggestions for improvements:

We will look into the number and timing of seminars and try to find a better way how to deal with the exam also with the changing rules regarding grading. We will try to preserve the aspects that have been highlighted as positive (changing lecturers etc)
